EDUCATIONAL BACKGROUND

Degree	Year	University	Field
Ph.D.	2005	Massachusetts Institute of Technology Cambridge, MA <i>Dissertation:</i> Proactive Techniques for Correct and Predictable Internet Routing <i>Sproles Honorable Mention for best MIT Ph.D. dissertation in computer science</i> <i>Advisor:</i> Hari Balakrishnan Minor in Game Theory	Computer Science
M.Eng.	2001	Massachusetts Institute of Technology Cambridge, MA <i>Dissertation:</i> Adaptive Delivery of Real-Time Streaming Video <i>Advisor:</i> Hari Balakrishnan <i>William A. Martin Memorial Thesis Award</i> (MIT M.Eng. thesis award)	Computer Science
S.B.	2000	Massachusetts Institute of Technology Cambridge, MA	Electrical Engineering and Computer Science

EMPLOYMENT HISTORY

Title	Organization	Years
Assistant Professor	Georgia Institute of Technology	2006–Present
Postdoctoral Research Staff	Princeton University	Fall 2005
Research Assistant	Massachusetts Institute of Technology	2000–2005
Intern/Consultant	AT&T Labs–Research	2001–2005
Technical Associate	Bell Laboratories	1999
Intern	Hewlett-Packard Laboratories	1999
Technical Staff	LookSmart, Ltd.	1997

CURRENT FIELDS OF INTEREST

My research focuses on networked computer systems, with a strong emphasis on network architecture and protocol design; network security, management and measurement; routing; and anti-censorship techniques. The primary goal of my research is to help network operators run their networks better, and to enable users of these networks (both public and private) to experience high availability and good end-to-end performance. I have a strong interest in tackling practical problems using a “first principles” approach, designing systems based on these principles, and implementing and deploying these systems in practice.

I. TEACHING

A. Courses Taught

Quarter/Year	Course Number & Title	Number of Students	Comments
Spring 2006	CS 7260 Internetworking Protocols and Architectures	27	New Syllabus
Fall 2006	CS 7001 Introduction to Graduate Studies	76	New Syllabus
Fall 2006	CS 8001 Networking Research Seminar	30	New Syllabus
Fall 2006	CS 1100 Freshman Leap Seminar	15	
Spring 2007	CS 7260 Internetworking Protocols and Architectures	55	
Fall 2007	CS 7001 Introduction to Graduate Studies	≈ 80	

Guest lecture for MIT Course 6.829 (Computer Networking) in Fall 2005.

Multiple guest lectures for CS 4251 (Computer Networks II) in Spring 2006.

Guest lecture for CS 3251 (Computer Networks I) in Fall 2006.

Guest lecture for CS 6250 (Advanced Computer Networks) in Fall 2007.

B. Curriculum Development

CS 7260 Internetworking Architectures and Protocols: *Spring 2006.* Developed a new project-based graduate course with substantial programming assignments using a wide variety of state-of-the-art networking software tools and platforms (*e.g.*, rcc, PlanetLab, scriptroute, NetFlow, etc.). Contributed questions to a larger bank of questions also used in graduate-level networking courses at Carnegie Mellon and MIT. Developed 24 new lectures, many based on current “hot topics” in computer networking (*e.g.*, spam, botnets, traffic anomaly detection, etc.)

Spring 2007. Developed two new course modules: (1) sound techniques for network measurement; and (2) evaluation platforms (Emulab, VINI, etc.). Developed new problem sets on these topics. With faculty at Carnegie Mellon, instituted the use of a cross-institutional online forum for paper discussion. Students read papers from the CS 7260 syllabus and comment on papers before class to help stimulate paper discussion; students also read the discussion blog and can comment on papers being discussed in networking classes at other schools.

CS 7001 Introduction to Graduate Studies: With Professor Alex Gray, I have developed a new course syllabus and structure to CS 7001 around the larger goal of introducing new students to *how to do great research* as soon as their first term at Georgia Tech. In contrast with previous terms, where CS 7001 consisted of faculty “advertisements” for their research and projects consisted of short “mini-projects” where little research could be accomplished in a short time span of 3 weeks, we have improved the syllabus by bringing in faculty members to talk about research philosophy, exciting new directions, etc. We have also given the students the option to do a research project that is a term-long project in conjunction with CS 8903; our goal is to give students the flexibility to select meaningful research problems based on their research assistantships while helping them learn the skills required for writing papers, finding and evaluating research ideas, and performing other tasks associated with doing great research.

C. Individual Student Guidance

C.1. Ph.D. Students Supervised

Anirudh Ramachandran College of Computing
Spring 2006 - Present

Publications: C.0.1, C.0.5, D.0.1, D.0.2, D.0.3, E.5.2

Research on network-level behavior of spammers and passive botnet detection.

Yiyi Huang College of Computing

Spring 2006 - Present

Publications: C.0.3

Co-advised with Jim Xu. Research on fast, distributed network anomaly detection.

Murtaza Motiwala College of Computing

Fall 2006 - Present

Publications: E.3.2, E.2.2, E.3.6

Research on (1) in-band troubleshooting and (2) scalable network architectures for path diversity.

Nadeem Syed College of Computing

Spring 2007 - Present

Co-advised with Alex Gray. Developing and implementing new machine learning techniques for fast disruption detection.

Mukarram Bin Tariq College of Computing

Spring 2007 - Present

Co-advised with Mostafa Ammar. Research on network troubleshooting.

Vytautas Valancius College of Computing

Summer 2007 - Present

Publications: E.3.3

Research on interdomain routing and network virtualization.

C.2. Masters Students Supervised

Winston Wang M.I.T. EECS

Fall 2002 - Spring 2003

Publications: D.0.7

Thesis on an implementation of the Infranet anti-censorship system received MIT's Charles and Jennifer Johnson Thesis Prize.

Chris Kelly College of Computing

Fall 2006 - Present

Developing new software features for the Campus-Wide Performance Monitoring and Recovery (CPR) project.

Manas Khadilkar College of Computing

Fall 2006 - Present

Publications: C.0.2

Research on efficient settings of lease times for DHCP address allocation. Algorithm in development, to be used on the Georgia Tech campus network for optimizing lease time settings.

Han Lu College of Computing

Fall 2006 - Spring 2007

Research on spam traffic patterns by IP address space, to study the persistence of spamming IP addresses.

Samantha Lo Hong Kong Polytechnic University

Spring 2007

Research on market-based network architectures and inbound traffic engineering.

C.3. Undergraduate Students Supervised

Hongyi Hu M.I.T. EECS

Spring 2005 - Fall 2005

Extensions to the *rcc* router configuration checker tool for static configuration analysis of internal routing protocol configurations.

C.4. Special Projects

Daniel Mentz College of Computing

Spring 2006 - Summer 2006

Research on campus network security troubleshooting.

Buddy Moore College of Computing

Summer 2006

Implemented distributed version of the Infranet anti-censorship software. Publicly available.

Amit Khanna College of Computing

Fall 2006

Implemented Secure BGP (S-BGP) in the Quagga software router. Software publically available and operators are using the codebase for ongoing work on certificates for secure routing.

Bhairav Dutia College of Computing

Fall 2006

Research on anti-censorship techniques and countermeasures.

Megan Benoit College of Computing

Fall 2006

Research on spammers' email address harvesting practices.

Sagar Mehta College of Computing

Fall 2006 - Present

Research on anti-phishing techniques.

Bilal Anwer College of Computing

Fall 2006 - Present

Research on support for hardware forwarding in virtual network environments.

Yogesh Munanda College of Computing

Fall 2007 - Present

Development of experiment specification for VINI.

II. RESEARCH AND CREATIVE SCHOLARSHIP

A. Theses

- A.0.1 Nick Feamster. *Proactive Techniques for Correct and Predictable Internet Routing*. PhD thesis, Massachusetts Institute of Technology, February 2006. Winner of the MIT George M. Sprowls Honorable Mention for Best MIT Ph.D. Dissertation in Computer Science.
- A.0.2 Nick Feamster. Adaptive delivery of real-time streaming video. Master's thesis, Massachusetts Institute of Technology, May 2001. Winner of the MIT EECS William A. Martin Memorial Thesis Award.

B. Journal Publications

- B.0.1 Nick Feamster and Jennifer Rexford. Network-Wide Prediction of BGP Routes. *IEEE/ACM Transactions on Networking*, June 2007.
- B.0.2 Nick Feamster, Ramesh Johari, and Hari Balakrishnan. Stable Policy Routing with Provider Independence. *IEEE/ACM Transactions on Networking*, 2007. *To appear*.
- B.0.3 Nick Feamster, Jaeyeon Jung, and Hari Balakrishnan. An Empirical Study of “Bogon” Route Advertisements. *ACM Computer Communications Review*, 35(1):63–70, November 2004.
- B.0.4 Nick Feamster, Jay Borkenhagen, and Jennifer Rexford. Guidelines for Interdomain Traffic Engineering. *ACM Computer Communications Review*, 33(5):19–30, October 2003.

C. Refereed Conference Publications

- C.0.1 Anirudh Ramachandran, Nick Feamster, and Santosh Vempala. Filtering spam with behavioral blacklisting. In *Proc. 14th ACM Conference on Computer and Communications Security*, Alexandria, VA, October 2007.
- C.0.2 Manas Khadilkar, Nick Feamster, Russ Clark, and Matt Sanders. Usage-Based DHCP Lease Time Optimization. In *Proc. ACM SIGCOMM Internet Measurement Conference*, San Diego, CA, October 2007. *To appear*.
- C.0.3 Yiyi Huang, Nick Feamster, Anukool Lakhina, and Jim Xu. Exposing Routing Problems with Network-Wide analysis. In *Proc. ACM SIGMETRICS*, San Diego, CA, June 2007.

- E.3.10 Nick Feamster and Jennifer Rexford. Network-Wide BGP Route Prediction for Traffic Engineering. In *Proc. SPIE ITCOM*, volume 4868, pages 55–68, Boston, MA, August 2002.
- E.3.11 Nick Feamster, Jennifer Rexford, and Jay Borkenhagen. Controlling the impact of BGP policy changes on IP traffic. Technical Report 011106-02, AT&T Labs–Research, Florham Park, NJ, November 2001.
- E.3.12 Russ White, B. Akyol, and Nick Feamster. *Considerations in Validating the Path in Routing Protocols*. IETF, June 2005.

E.4. Software

- E.4.1 *Virtual Network Infrastructure*. In progress project to build a large distributed testbed for specifying virtual network topologies and experimenting with routing protocols and architectures in a controlled, realistic emulation environment. Current prototype implementation is on PlanetLab.
- E.4.2 *The Datapository*. Originally the “MIT BGP Monitor”, the Datapository is growing to support multiple data feeds (e.g., spam, end-to-end measurement probes, traceroutes, Abilene data, etc.). Currently used by researchers at Georgia Tech, Carnegie Mellon, University of Michigan, Princeton, MIT.

- E.4.3 *Secure BGP Implementation*. Implementation of S-BGP in the Quagga software router. Our implementation may be used by Randy Bush and Geoff Huston in their project to develop a certificate infrastructure for secure routing protocols.
- E.4.4 *rcc: router configuration checker*. Static configuration analysis tool for Border Gateway Protocol (BGP) routing configurations. Downloaded by over 100 network operators and many large, nationwide backbone ISPs around the world.
- E.4.5 *Infranet*. System for circumventing Web censorship firewalls (e.g., those in China, Saudi Arabia, etc.). Available on Sourceforge. Featured in articles in *Technology Review*, *New Scientist*, and *Slashdot*.
- E.4.6 *SR-RTP*. Transport protocol for selective retransmission of packets in an MPEG video stream. Incorporated into “Oxygen TV” for MIT Project Oxygen. Some ideas incorporated into the OpenDivX video transport protocol.

E.5. Conference Posters

- E.5.1 Murtaza Motiwala, Andy Bavier, and Nick Feamster. In-Band Network Troubleshooting. In *Proc. Fourth Symposium on Networked Systems Design and Implementation (NSDI)*, Cambridge, MA, April 2007.
- E.5.2 Anirudh Ramachandran and Nick Feamster. Understanding the Network-Level Behavior of Spammers. In *Proc. Third Symposium on Networked Systems Design and Implementation (NSDI)*, San Jose, CA, May 2006.
- E.5.3 Nick Feamster and Hari Balakrishnan. Detecting BGP Configuration Faults with Static Analysis. In *Proc. First Symposium on Networked Systems Design and Implementation (NSDI)*, San Francisco, CA, March 2004.

F. Research Proposals and Grants (Principal Investigator)

1. Approved and Funded

- F.1.1 **Verification and Modeling of Wide-Area Internet Routing**
 Sponsor: Cisco Systems University Research Program
 Investigator(s): N. Feamster and H. Balakrishnan
 Amount: \$ 95,500 for 1 year.
 Awarded: June 2004
- F.1.2 **CABO: Concurrent Architectures are Better than One**
 Sponsor: National Science Foundation NeTS-FIND Program
 Investigator(s): N. Feamster, L. Gao, J. Rexford
 Amount: \$ 300,000 for 4 years
 Awarded: June 2006
- F.1.3 **Equipment Donation for Network Operations Research**
 Sponsor: Intel Corporation
 Investigator(s): N. Feamster
 Amount: \$30,000
 Awarded: October 2006
- F.1.4 **Improving Network Operations with a View from the Edge.**
 Sponsor: National Science Foundation CAREER Program
 Investigator(s): N. Feamster

Amount: \$400,000 for 5 years.
Awarded: January 2007

F.1.5 Fish4Phish: Fishing for Phishing in a Large Pond

Sponsor: AT&T Labs—Research
Investigator(s): N. Feamster, O. Spatscheck, K. van der Merwe
Amount: *Funding for summer intern.*
Awarded: February 2007

F.1.6 Towards an Accountable Internet Architecture

Sponsor: D. Andersen, H. Balakrishnan, N. Feamster, S. Shenker
Investigator(s): National Science Foundation CyberTrust Program (Team Proposal)
Amount: \$ 300,000 for 3 years.
Awarded: May 2007

F.1.7 SCAN: Statistical Collaborative Analysis of Networks

Sponsor: National Science Foundation NeTS-NBD Program
Investigator(s): N. Feamster, A. Gray, J. Hellerstein, C. Guestrin
Amount: \$ 95,000 for 3 years.
Awarded: June 2007

F.1.8 Spam Filtering Research

Sponsor: IBM Faculty Award
Investigator(s): N. Feamster
Amount: \$ 7,500 (unrestricted gift)
Awarded: June 2007

2. Pending

F.2.1 Spam Processing, Archiving, and Monitoring Community Facility (SPAM Commons)

Sponsor: National Science Foundation CRI-CRD Program
Investigator(s): C. Pu, N. Feamster, M. Ahamad
Amount: \$992,382 for 3 years
Submitted: August 2007

F.2.2 Enabling Security and Network Management Research for Future Networks

Sponsor: National Science Foundation CRI-IAD Program
Investigator(s): Z. Mao, N. Feamster
Amount: \$397,426 for 3 years
Submitted: August 2007

F.2.3 Proactive Defenses Against Spam Using Behavioral Blacklisting

Sponsor: Cisco Systems / Ironport Systems
Investigator(s): N. Feamster
Amount: \$99,821 for 1 year
Submitted: June 2007

F.2.4 Synthesizing Data and Control-Plane Monitoring to Contain BGP Attacks

Sponsor: Department of Homeland Security
Investigator(s): Z.M. Mao, N. Feamster, F. Jahanian
Amount: \$241,423 for 3 years
Submitted: June 2007

3. Not Funded

F.3.1 **Detecting Botnets to Stem Spam and Phrustrate Phishing**

Sponsor: Cisco Systems University Research Program

Investigator(s): N. Feamster

Amount: \$ 95,396 for 1 year.

Submitted: August 2006, March 2006

F.3.2 **Network-Wide Analysis for Secure, Correct Network Operations**

Sponsor: Cisco Systems University Research Program

Investigator(s): N. Feamster

Amount: \$ 95,396 for 1 year.

Submitted: August 2006, March 2006.

F.3.3 **Efficiency of Routing in a Federated Internet**

Sponsor: National Science Foundation NeTS-FIND Program.

Investigator(s): N. Feamster, R. Johari, V. Vazirani

Amount: \$ 677,095 for 3 years.

Submitted: March 2006

F.3.4 **Providing Configuration Assurance with Network-Wide Analysis**

Sponsor: DARPA/ARO NICECAP Program.

Investigator(s): N. Feamster, R. Clark

Amount: White paper.

Submitted: May 2006

F.3.5 **AGORA: AGregator-Oriented Architecture**

Sponsor: National Science Foundation NeTS-FIND Program

Investigator(s): N. Feamster, R. Johari, V. Vazirani

Amount: \$ 618,582 for 3 years.

Submitted: January 2007

G. Research Proposals and Grants (Contributor)

1. Approved and Funded

G.1.1 **Development of a shared network measurement storage and analysis infrastructure**

Sponsor: National Science Foundation Major Research Infrastructure (MRI)

Investigator(s): D. Andersen, D. Song, C. Wang, H. Zhang

Amount: \$ 101,488.96

User and developer for proposed infrastructure; possible equipment money to Georgia Tech .

Submitted: February 2006.

2. Pending

3. Not Funded

G.3.1 **The World is WAM (Wireless and Mobile)**

Sponsor: National Science Foundation Computing Research Infrastructure (CRI-IAD) Program

Investigator(s): G. Abowd, M. Ahamad, T. Balch, B. MacIntyre, C. Isbell, K. Edwards, I. Essa, N. Feamster, G. Riley, W. Lee, R. Lipton, L. Liu, M. Sanders, K. Ramachandran, R. Clark, S. Pande, R. Sivakumar, T. Starner, E. Zegura

Amount: \$1,999,422

Submitted: November 2006.

H. Other

H.0.1 In-Band, Bottom-Up Support for Network Accountability

Sponsor: N. Feamster, W. Lee, M. Ahamad
Investigator(s): DARPA Strategic Technology Office
Amount: *White paper / Request for Information.*
Submitted: *February 2007*

H.0.2 Towards an Accountable Internet Architecture

Sponsor: D. Andersen, H. Balakrishnan, N. Feamster, S. Shenker
Investigator(s): DARPA Strategic Technology Office
Amount: *White paper / Request for Information.*
Submitted: *February 2007*

I. Research Honors and Awards

2007	IBM Faculty Award
2007	NSF CAREER Award
2006	George M. Sprowls honorable mention for best Ph.D. thesis in computer science, MIT
2006	Best Student Paper, <i>ACM SIGCOMM</i> (Premier Networking Conference)
2005	Best Paper, <i>2nd USENIX Symposium on Networked Systems Design and Implementation</i>
2002	Best Student Paper, <i>11th Usenix Security Symposium</i>
2001	Best Student Paper, <i>10th Usenix Security Symposium</i>
2002–2005	NSF Graduate Research Fellow
2001	MIT William A. Martin Memorial Thesis Award for Best EECS Master's Thesis

III. SERVICE

A. Professional Activities

A.1. Memberships and Activities in Professional Societies

Member, ACM Special Interest Group on Data Communications (SIGCOMM)

Member, USENIX Technical Association

A.2. Conference Committee Activities

2008	Program Committee, <i>ACM SIGMETRICS</i>
2008	Program Committee, <i>ACM SIGCOMM</i>
2008	Program Committee, <i>17th International World Wide Web Conference (Security/Privacy Track)</i>
2007	Program Committee, <i>3rd Annual CoNext Conference</i>
2007	Program Committee, <i>ACM SIGCOMM Workshop on Internet Management (INM)</i>
2007	Program Committee, <i>ACM SIGMETRICS Workshop on Mining Internet Data (MineNet)</i>
2007	Co-Organizer , DIMACS Workshop Series on Internet Security
2007	Program Committee, <i>4th Conference on Email and Anti-Spam (CEAS)</i>
2007	Program Committee, <i>3rd USENIX Workshop on Steps to Reduce Unwanted Traffic on the Internet (SRUTI)</i>
2007	Program Committee, <i>USENIX Technical Conference</i>
2007	Program Committee, <i>CoNext</i>
2007	Program Committee, <i>16th International World Wide Web Conference (Security/Privacy Track)</i>
2007	Program Committee Co-Chair, <i>ACM/USENIX Workshop on Networks meet Databases (NetDB)</i>
2006–	Program Committee, <i>North American Network Operators Group (NANOG)</i>
2006	Organizer, <i>Workshop on Internet Routing Evolution and Design</i>
2006	Program Committee, <i>ACM SIGCOMM Internet Measurement Conference</i>
2006	Program Committee Co-Chair , <i>Workshop on the Economics of Networked Systems (NetE-con)</i>
2006	Program Committee Co-Chair , <i>CoNext Student Workshop</i>
2006	Program Committee, <i>2nd Annual CoNext Conference</i>
2006	Program Committee, <i>ACM SIGCOMM Workshop on Internet Network Management</i>
2006	Program Committee, <i>IEEE Symposium on Security and Privacy</i>
2006	Program Committee, <i>IEEE Infocom Student Poster Session</i>
2006	Program Committee, <i>IEEE International Conference on Internet Surveillance and Protection</i>

External reviewer for *IEEE/ACM Transactions on Networking*, *SIGCOMM* (2002, 2003, 2004, 2006, 2007), *SOSP* (2001, 2003), *Infocom* (2004, 2006), *HotNets* (2003), *HotOS* (2001), *USENIX Security Symposium* (2002), *ACM Computer Communication Review*, *IEEE Network Magazine*, *IEEE Journal on Selected Areas in Communications*,

Image Communication (EURASIP), ASPLOS (2004), MobiSys (2004), USENIX (2005, 2006), NSDI (2005, 2006), IPTPS (2005), Workshop on Privacy Enhancing Technologies (2006).

A.3. Workshops and External Courses

Unless otherwise noted, all listed activities are invited speaking invitations for workshops, tutorials, and symposia.

August 2007	DIMACS Tutorial on Algorithms for Next Generation Networks, New Brunswick, NJ
July 2007	INTIMATE Workshop on Methods and Tools for Network Analysis, Paris, France
May 2007	Workshop on Programmable Routers for Extensible Services of Tomorrow (PRESTO), Princeton, NJ
April 2007	NeXtworking, the Second COST-NSF Workshop on Future Internet, Berlin, Germany
February 2007	GIG Routing and Addressing Workshop, Washington, DC
February 2007	DARPA Workshop on Assurable Global Networking, Washington, DC
December 2006	Next-Generation Internet Workshop, Lisbon, Portugal
September 2006	Clean Slate Network Research Symposium, Cambridge, UK
October 2006	Co-organizer , Workshop on Internet Routing Evolution and Design (WIRED), Atlanta, GA
August 2006	Cisco Routing Research Symposium, San Jose, CA
June 2006	ARO-DARPA-DHS Special Workshop on Botnets, Arlington, VA
June 2006	Microsoft Research EdgeNet Workshop, Snoqualmie, WA
June 2006	Microsoft Research "Networking on the Edge" Workshop on Network Management, Seattle, WA
February 2006	NSF Workshop on Theory of Networked Computation, Princeton, NJ
January 2006	Cisco Network Management Summit, San Jose, CA

B. On-Campus Georgia Tech Committees

Spring 2006	Ph.D. Recruiting Weekend Organizing Committee, CSS Division Leader
Spring 2006 –	College of Computing Strategic Planning Committee
Fall 2006 –	Area Coordinator, Networking and Telecommunications Group
Fall 2006	Co-Organizer, Networking and Telecommunications Group Open House

C. Member of Ph.D. Examining Committees

Ph.D. Thesis Committee – Georgia Tech

1. Ruomei Gao, College of Computing, Georgia Tech., Fall 2005.
Principal Advisor: Professors Ellen Zegura and Constantine Dovrolis.
2. Sridhar Srinivasan, College of Computing, Georgia Tech., Spring 2006.
Principal Advisor: Professor Ellen Zegura.

3. Xenofontas Dimitropoulos, Electrical and Computer Engineering, Georgia Tech., Spring 2006.
Principal Advisor: Professor George Riley.
4. Qi Zhao, College of Computing, Georgia Tech., Spring 2006.
Principal Advisor: Professor Jim Xu.
5. Prahlad Fogla, College of Computing, Georgia Tech., Spring 2007.
Principal Advisor: Professor Wenke Lee.
6. Srinivasan Seetharaman, College of Computing, Georgia Tech., Spring 2007.
Principal Advisor: Professor Mostafa Ammar.

Other — Question writer for Ph.D. Qualifying Exam

1. Yang Chen, College of Computing, Georgia Tech., Spring 2006.
Principal Advisor: Professor Jim Xu.
2. Mukarram Bin Tariq, College of Computing, Georgia Tech., Spring 2007.
Principal Advisor: Professor Nick Feamster.
3. Zhenshun Zhang, College of Computing, Georgia Tech., Spring 2007.
Principal Advisor: Professor Raghupathy Sivakumar.

D. Consulting, Advisory, and Other External Appointments

1. Technical Advisory Board, Guavus, Inc. <http://www.guavus.com/>
2. Technical Advisory Board, Fraudwall, Inc. <http://www.fraudwall.net/>
3. Consultant, Damballa, Inc. <http://www.damballa.com/>

E. Research Project Reviewer

1. National Science Foundation. March 2007.
Panel: Cybertrust Program.
2. National Science Foundation. February 2007.
Panel: Computing Research Infrastructure (CRI) Program.
3. Department of Homeland Security. Fall 2006 - Present.
Panel: Predict Review Board.

IV. NATIONAL AND INTERNATIONAL RECOGNITION

A. Invited Conference Session Chair

- June 2007 Session chair, Network Virtualization, *NSF NeTS-FIND PI Meeting*, Arlington, VA
- June 2006 Session chair, Mechanism Design and Networking, *First Workshop on the Economics of Networked Systems (NetEcon06)*, Ann Arbor, MI

B. Patents

- March 2007 “Method and System for Detecting and Responding to Attacking Networks”, U.S. Patent Application # 11/538,212

C. Editorial and Reviewer Work for Technical Journals and Publishers

- External reviewer for *IEEE/ACM Transactions on Networking*
- External reviewer for *IEEE Journal on Selected Areas in Communications*
- External reviewer for *IEEE Computer Networks*
- External reviewer for *ACM Transactions on Information and Systems Security*

V. OTHER CONTRIBUTIONS

A. Seminar Presentations

- A.0.1 Towards an Accountable Internet Architecture. In *INTIMATE Workshop on Methods and Tools for Network Analysis*, Paris, France, July 2007.
- A.0.2 Path Splicing with Network Slicing. In *UCL Networking Seminar*, Louvain La Neuve, Belgium, July 2007.
- A.0.3 Composing Virtual Networks. In *Third NSF-NeTS FIND PI Meeting*, Arlington, VA, June 2007.
- A.0.4 Path Splicing with Network Slicing. In *UCSD Networking and Systems Seminar*, San Diego, CA, June 2007.
- A.0.5 Path Splicing with Network Slicing. In *NANOG 40*, Bellevue, WA, June 2007.
- A.0.6 AGORA: A Market for Internet Connectivity. In *Workshop on Programmable Routers for Extensible Services of Tomorrow*, Princeton, NJ, May 2007.
- A.0.7 Path Splicing with Network Slicing. In *NeXtworking 2007, the Second COST-NSF Workshop on Future Internet*, Berlin, Germany, April 2007.
- A.0.8 Towards an Accountable Internet Architecture. In *DARPA GIG Routing and Addressing Workshop*, Arlington, VA, February 2007.
- A.0.9 Towards an Accountable Internet Architecture. In *DARPA STO Assurable Global Networking Workshop*, Arlington, VA, February 2007.
- A.0.10 Improving Network Operations with a View from the Edge. In *National Science Foundation CyberTrust PI Meeting*, Atlanta, GA, January 2007.
- A.0.11 Network Virtualization for Experimentation and Profit. In *University of Michigan Networking Seminar*, Ann Arbor, MI, December 2006.

- A.0.12 Network Virtualization for Experimentation and Profit. In *Stanford Networking Seminar*, Stanford, CA, November 2006.
- A.0.13 Network Architecture Research. In *National Science Foundation NeTS-FIND Informational Meeting*, Reston, VA, November 2006.
- A.0.14 Network Virtualization. In *National Science Foundation NeTS-FIND PI Meeting*, Reston, VA, November 2006.
- A.0.15 Understanding the Network-Level Behavior of Spammers. In *Johns Hopkins Security and Applied Research Lab Seminar*, Baltimore, MD, October 2006.
- A.0.16 Revealing Botnet Membership with DNSBL Counter-Intelligence. In *NANOG 38*, St. Louis, MO, October 2006.
- A.0.17 VINI: A Virtual Network Infrastructure. In *Centre national de la recherche scientifique (CNRS)*, Paris, France, September 2006.
- A.0.18 Botnets and Spam. In *Seminar: Laboratoire d'informatique de Paris 6*, Paris, France, September 2006.
- A.0.19 Network Virtualization and Graph Embedding. In *Georgia Tech Algorithms and Randomness Center Seminar*, Atlanta, GA, September 2006.
- A.0.20 Cabo: Concurrent Architectures are Better than One. In *Cisco Internet Routing Research Symposium*, San Jose, CA, August 2006.
- A.0.21 Botnets and Spam. In *ARO-DARPA-DHS Special Workshop on Botnets*, Arlington, VA, June 2006.
- A.0.22 Understanding the Network-Level Behavior of Spammers. In *CS 548: Internet and Distributed Systems Seminar*, Stanford, CA, June 2006.
- A.0.23 Understanding the Network-Level Behavior of Spammers. In *NANOG 37*, San Jose, CA, June 2006.
- A.0.24 Campus and Personal Network Troubleshooting. In *Microsoft Research EdgeNet 2006*, Snoqualmie, WA, June 2006.
- A.0.25 Infranet: Circumventing Web censorship and surveillance. In *Georgia Tech NTG Seminar*, Atlanta, GA, April 2006.
- A.0.26 Filtering: Sharpening Two Sides of a Double-Edged Sword. In *Interzone 5*, Tucker, GA, March 2006.
- A.0.27 Theory of Measurement and Monitoring. In *Workshop on the Theory of Networked Computation*, Princeton, NJ, February 2006.
- A.0.28 Challenges and Opportunities in Internet Data Mining. In *Cisco Network Management Summit*, San Jose, CA, February 2006.
- A.0.29 BGP Spamming Agility. In *NANOG 36*, Dallas, TX, February 2006.
- A.0.30 Spam Forensics. In *IEEE Security and Privacy Crystal Ball Workshop*, Berkeley, CA, February 2006.
- A.0.31 Network Security. In *Georgia Tech Information Security Center Lunch*, Atlanta, GA, January 2006.

- A.0.32 Geographic Locality of IP Prefixes. In *NANOG 35*, Los Angeles, CA, October 2005.
- A.0.33 rcc demonstration. In *NANOG 35*, Los Angeles, CA, October 2005.
- A.0.34 Detecting BGP Configuration Faults with Static Analysis. In *Princeton University Systems Reading Group*, Princeton, NJ, October 2005.
- A.0.35 Proactive Techniques for Correct and Predictable Internet Routing. In *University of Cambridge Symposium*, England, United Kingdom, June 2005.
- A.0.36 Proactive Techniques for Correct and Predictable Internet Routing. In *Hewlett-Packard Laboratories*, Palo Alto, CA, October 2005.
- A.0.37 Open problems in BGP anomaly detection. In *CAIDA Workshop on Internet Signal Processing*, San Diego, CA, November 2004.
- A.0.38 On end-to-end path failures and routing instability. In *CAIDA Workshop on Internet Signal Processing*, San Diego, CA, November 2004.
- A.0.39 Wide-area network data and analysis at MIT. In *CAIDA Internet Measurement Data Catalog Workshop*, San Diego, CA, June 2004.
- A.0.40 Verifying wide-area routing configuration. In *NANOG 31*, San Francisco, CA, May 2004.
- A.0.41 Verifying wide-area routing configuration with **rcc**. AT&T Labs; Florham Park, NJ, February 2004.
- A.0.42 Verifying wide-area routing configuration with **rcc**. In *NYU Systems Reading Group*, New York, NY, February 2004.
- A.0.43 A systematic approach to BGP configuration checking. In *NANOG 29*, Chicago, IL, October 2003.
- A.0.44 Characterizing path failures: Location, characterization, correlation. In *CAIDA Internet Statistics, Metrics, and Analysis Workshop*, Leiden, The Netherlands, October 2002.
- A.0.45 Infranet: Circumventing Web censorship and surveillance. In *Harvard Kennedy School of Government Seminar*, Cambridge, MA, November 2002.
- A.0.46 Infranet: Circumventing Web censorship and surveillance. Hewlett-Packard Laboratories; Palo Alto, CA, August 2002.
- A.0.47 Infranet: Circumventing Web censorship and surveillance. In *Carnegie Mellon University SDI Seminar*, Pittsburgh, PA, April 2002.
- A.0.48 Controlling the impact of BGP policy changes on IP traffic. In *NANOG 25*, Toronto, Ontario, Canada, June 2002.
