## EDUCATIONAL BACKGROUND

Degree	Year	University	Field
Ph.D.	2005	Massachusetts Institute of Technology Cambridge, MA <i>Dissertation:</i> Proactive Techniques for Correct and Predictable Internet Routing <i>Sprolws Honorable Mention for best MIT Ph.D. dissertation in computer science</i> <i>Advisor:</i> Hari Balakrishnan Minor in Game Theory	Computer Science
M.Eng.	2001	Massachusetts Institute of Technology Cambridge, MA <i>Dissertation:</i> Adaptive Delivery of Real-Time Streaming Video <i>Advisor:</i> Hari Balakrishnan <i>William A. Martin Memorial Thesis Award</i> (MIT M.Eng. thesis award)	Computer Science
S.B.	2000	Massachusetts Institute of Technology Cambridge, MA	Electrical Engineering and Computer Science

## EMPLOYMENT HISTORY

Title	Organization	Years
Assistant Professor	Georgia Institute of Technology	2006–Present
Postdoctoral Research Staff	Princeton University	Fall 2005
Research Assistant	Massachusetts Institute of Technology	2000–2005
Intern/Consultant	AT&T Labs–Research	2001–2005
Technical Associate	Bell Laboratories	1999
Intern	Hewlett-Packard Laboratories	1999
Technical Staff	LookSmart, Ltd.	1997

## CURRENT FIELDS OF INTEREST

My research focuses on networked computer systems, with a strong emphasis on network architecture and protocol design; network security, management and measurement; routing; and anti-censorship techniques. The primary goal of my research is to help network operators run their networks better, and to enable users of these networks (both public and private) to experience high availability and good end-to-end performance. I have a strong interest in tackling practical problems using a “first principles” approach, designing systems based on these principles, and implementing and deploying these systems in practice.

# I. TEACHING

## A. Courses Taught

Term	Year	Number of Course Number & Title	Students	Comments
Spring	2010	CS 3251 Computing Networking I	53	
Spring	2010	CS 8803 NGN Next Generation Networking	50	New Course
Fall	2009	CS 7001 Introduction to Graduate Studies	39	
Spring	2009	CS 6262 Network Security	45	Updated Syllabus
Fall	2008	CS 4251 Computer Networking II	16	
Fall	2008	CS 7001 Introduction to Graduate Studies	44	
Spring	2008	CS 4251 Computer Networking II	14	New Syllabus
Fall	2007	CS 7001 Introduction to Graduate Studies	53	
Spring	2007	CS 7260 Internetworking Protocols and Architectures	29	
Fall	2006	CS 7001 Introduction to Graduate Studies	74	New Syllabus
Fall	2006	CS 8001 Networking Research Seminar	30	New Syllabus
Fall	2006	CS 1100 Freshman Leap Seminar	15	
Spring	2006	CS 7260 Internetworking Protocols and Architectures	27	New Syllabus

Tutorials on BGP Multiplexer at GENI Experimenters Workshop and GENI Engineering Conference in Summer 2010.

Tutorial on network security at African Network Operators Group (AfNOG) in Summer 2009. Tutorial on internet routing at Simposio Brasileiro de Redes de Computadores (SBRC) in Summer 2008.

Lecture for DIMACS Tutorial on Next-Generation Internet Routing Algorithms in August 2007.

Guest lecture for CS 6250 (Advanced Computer Networks) in Fall 2007.

Guest lecture for CS 3251 (Computer Networks I) in Fall 2006.

Multiple guest lectures for CS 4251 (Computer Networks II) in Spring 2006.

Guest lecture for MIT Course 6.829 (Computer Networking) in Fall 2005.

## B. Curriculum Development

**CS 8803 Next-Generation Networking:** I have developed a brand-new graduate course that gives students practical experience with a variety of tools for next-generation networking, ranging from the Click software router to the OpenFlow switch framework. The course also teaches students about the state of the art in networking research—students read papers about research and industry trends and do a course project that incorporates aspects of these new technologies. This course relates to the larger nationwide effort on Global Environment for Network Innovations (GENI), which is building infrastructure for researchers to provide the next generation of networking protocols and technologies.

**CS 7001 Introduction to Graduate Studies:** With Professor Alex Gray, I have developed a new course syllabus and structure to CS 7001 around the larger goal of introducing new students to *how to do great research* as soon as their first term at Georgia Tech. In contrast with previous terms, where CS 7001 consisted of faculty “advertisements” for their research and projects consisted of short “mini-projects” where little research could be accomplished in a short time span of 3 weeks, we have improved the syllabus by bringing in faculty members to talk about research philosophy, exciting new directions, etc. We have also given the students the option to do a research project that is a term-long project in conjunction with CS 8903; our goal is to give students the flexibility to select meaningful research problems based on their research assistantships while helping them learn the skills required for writing papers, finding and evaluating research ideas, and performing other tasks associated with doing great research. Alex Gray and I wrote a conference paper on our development of this course, which appeared at *ACM SIGCSE 2008*.

**College of Computing Research Day and Seminar Series:** In addition to the course itself, to fulfill some of the functions of the former 7001 course, Alex Gray and I financed and organized a college-wide seminar series and research day in Fall 2009. Throughout the term, faculty speakers from across the college gave one-hour talks about their research; we raised money from Yahoo to support this event. The research day brings together students and faculty from around the college to see talks, demonstrations, and posters from around the college to exchange ideas.

**CS 4251 Computer Networking II:** *Spring/Fall 2008.* I developed new hands-on assignments to give students experience with real-world networking tools and software (*e.g.*, Emulab, Quagga, Click). I also revamped the course around various high-level themes in networking, including layering, resource sharing, tree formation (routing and forwarding, etc.). Finally, I developed over 20 new lectures for the syllabus, as well as new problem sets which can be re-used for future offerings of the course.

**CS 6262 Network Security:** *Spring 2009.* I updated the syllabus to include recent network attacks (*e.g.*, spam, botnets, reflection attacks, etc.) and also to integrate more hands-on assignments. Updating problem sets and project lists.

**CS 7260 Internetworking Architectures and Protocols:** *Spring 2006.* I developed a new project-based graduate course with substantial programming assignments using a wide variety of state-of-the-art networking software tools and platforms (*e.g.*, rcc, PlanetLab, scriptroute, NetFlow, etc.). I contributed questions to a larger bank of questions also used in graduate-level networking courses at Carnegie Mellon and MIT. Finally, I developed 24 new lectures, many based on current “hot topics” in computer networking (*e.g.*, spam, botnets, traffic anomaly detection, etc.)

*Spring 2007.* I developed two new course modules: (1) sound techniques for network measurement; and (2) evaluation platforms (Emulab, VINI, etc.). I designed new problem sets on these topics. With faculty at Carnegie Mellon, I instituted the use of a cross-institutional online forum for paper discussion. Students read papers from the CS 7260 syllabus and commented on papers before class to help stimulate paper discussion; students also read the discussion blog and could comment on papers being discussed in networking classes at other schools.

## **C. Individual Student Guidance**

### **C.1. Postdocs Supervised**

**Cristian Lumezanu** College of Computing  
*Fall 2009 - Present*  
Research on Internet measurement and economics.

### **C.2. Ph.D. Students Supervised**

**Hyojoon Kim** College of Computing  
*Fall 2009 - Present*  
Research on programmable networks and network configuration.

**Robert Lychev** College of Computing  
*Fall 2008 - Present*  
Research on contract enforcement for transit markets.  
*Taken qualifier (grading in progress).*

**Sam Burnett** College of Computing

*Fall 2008 - Present*

Publications: *D.0.2, F.5.2, F.5.7*

*Design and implementation of anti-censorship systems.*

Taken qualifier (grading in progress).

**Srikanth Sundaresan** College of Computing

*Fall 2008 - Present*

Publications: *F.5.3*

*Research on access network performance and online traffic engineering.*

Taken qualifier (grading in progress).

**Bilal Anwer** College of Computing

*Fall 2008 - Present*

Publications: *D.0.1, E.0.1, E.0.4*

*Research on support for hardware forwarding in virtual network environments.*

Taken qualifier (grading in progress).

**Shuang Hao** College of Computing

*Fall 2007 - Present*

Publications: *F.3.7, D.0.9*

*Research on botnet detection, network monitoring, and spam filtering.*

Taken qualifier (grading in progress).

**Maria Konte** College of Computing

*Fall 2007 - Present*

Publications: *D.0.10*

*Measurement study of fast-flux networks.*

Taken qualifier (grading in progress).

**Yogesh Mundada** College of Computing

*Fall 2007 - Present*

Publications: *F.3.8, F.5.9*

*Development of experiment specification for VINI and integration of VINI with Emulab.*

Taken qualifier (grading in progress).

**Vytautas Valancius** College of Computing

*Summer 2007 - Present*

Publications: *D.0.4 E.0.7, E.0.6 F.3.5, F.3.8, F.3.13, F.5.1 F.5.9, F.5.10*

*Research on interdomain routing and network virtualization.*

Passed qualifier.

**Mukarram Bin Tariq** College of Computing

*Spring 2007 - Spring 2010*

Publications: *D.0.13, D.0.7, D.0.6, E.0.8, F.1.1, F.3.6*

*Co-advised with Mostafa Ammar. Research on statistical inference methods for network planning and troubleshooting problems. Mukarram's dissertation work is now part of operational systems at Google.*

Graduated. Now works full-time at Google in the network monitoring group.

**Murtaza Motiwala** College of Computing

*Fall 2006 - Present*

Publications: *D.0.12, E.0.11, F.3.8, F.3.9, F.3.12, F.3.16, F.5.9*

*Research on (1) in-band troubleshooting and (2) scalable network architectures for path diversity, including path splicing.*

Passed qualifier.

**Anirudh Ramachandran** College of Computing

*Spring 2006 - Present*

Publications: *C.0.1, D.0.16, D.0.21, E.0.10, E.0.13, E.0.14, E.0.15, F.3.4, F.3.6, F.5.8, F.5.13*

*Research on network-level behavior of spammers and passive botnet detection.*

Passed qualifier and proposal defense. Expected graduation Fall 2010.

### **C.3. Masters Students Supervised**

**Ankur Nayak** College of Computing

*Spring 2009 - Spring 2010*

Publications: *E.0.5*

*Dynamic access control with programmable switches.*

**Umayr Hassan** College of Computing

*Fall 2008 - Spring 2010*

*Research on the design of a market for Internet transit, and on home network configuration.*

*Umayr now works full-time at Bloomberg.*

**Nadeem Syed** College of Computing

*Spring 2007 - Spring 2008*

Publications: *F.5.11*

*Co-advised with Alex Gray. Developing and implementing new machine learning techniques for fast disruption detection.*

Nadeem is in the MBA program at Georgia Tech.

**Kaushik Bhandakar** College of Computing

*Spring 2007 - Summer 2008*

Publications: *F.5.8*

*Experiments for VINI performance benchmarking; implementation and prototyping for the “Pedigree” packet provenance project; research on incentives in BitTorrent.*

Kaushik now works full-time at Google.

**Samantha Lo** Hong Kong Polytechnic University

*Spring 2007*

*Research on market-based network architectures and inbound traffic engineering.*

*Samantha is now a Ph.D. student at Georgia Tech.*

**Manas Khadilkar** College of Computing

*Fall 2006 - Spring 2007*

Publications: *D.0.17*

*Research on efficient settings of lease times for DHCP address allocation. Algorithm in development, to be used on the Georgia Tech campus network for optimizing lease time settings.*

Manas now works full-time for Expedia.

**Han Lu** College of Computing

*Fall 2006 - Spring 2007*

*Research on spam traffic patterns by IP address space.*

**Chris Kelly** College of Computing

*Fall 2006 - Fall 2007*

*Developing new software features for the Campus-Wide Performance Monitoring and Recovery (CPR) project.*

*Chris now works full-time for SugarCRM, an Atlanta-based startup.*

**Yiyi Huang** College of Computing

*Spring 2006 - Fall 2009*

Publications: *D.0.18, F.3.10*

*Co-advised with Jim Xu. Research on fast, distributed network anomaly detection.*

Yiyi now works full-time at Microsoft.

**Winston Wang** M.I.T. EECS

*Fall 2002 - Spring 2003*

Publications: *E.0.19*

*Thesis on an implementation of the Infranet anti-censorship system received MIT's Charles and Jennifer Johnson Thesis Prize.*

#### **C.4. Undergraduate Students Supervised**

**Alex Reimers** College of Computing

*Spring 2009*

Publications: *E.0.5*

*Worked on dynamic access control (a replacement of Georgia Tech OIT's current authentication system) with programmable switches. Alex now works full time at Cisco.*

**Megan Elmore** College of Computing

*Fall 2007 - Spring 2009*

Publications: *D.0.12*

*Experiments for interdomain path splicing; design and implementation of the path splicing prototype. Work received 2nd prize in 2008 Georgia Tech College of Computing undergraduate research competition. Megan was also the winner of the 2009 College of Computing Undergraduate Research Award, and the 2009 Sigma Xi Best Undergraduate Researcher Award. Megan is now a Ph.D. student at Stanford University.*

**Hongyi Hu** M.I.T. EECS

*Spring 2005 - Fall 2005*

*Extensions to the *rcc* router configuration checker tool for static configuration analysis of internal routing protocol configurations.*

#### **C.5. Special Projects**

**Mona Chitnis** College of Computing

*Spring 2010*

*Research on OpenFlow network architectures.*

**Sravanthi Gondhi** College of Computing

*Spring 2010*

*Research on online traffic engineering.*

**Shruti Gupta** College of Computing

*Spring 2010*

*Research on online traffic engineering.*

**Utkarsh Shrivastava** College of Computing

*Spring 2010*

*Research on network-level behavior of spammers.*

**Pooja Rajanna** College of Computing

*Spring 2010*

*Research on network-level behavior of spammers.*

**Luxmi Saha** College of Computing  
*Spring 2010*  
Research on data-center scheduling algorithms.

**Dongchan Kim** College of Computing  
*Fall 2009*  
Research on spam filtering.

**Sonali Batra** College of Computing  
*Summer 2009*  
Research on anti-phishing techniques.

**Radhika Partharathy** College of Computing  
*Fall 2008*  
Research on anti-phishing techniques.

**Sagar Mehta** College of Computing  
*Fall 2006 - Spring 2008*  
Research on anti-phishing techniques.

**Bhairav Dutia** College of Computing  
*Fall 2006*  
Research on anti-censorship techniques and countermeasures.

**Megan Benoit** College of Computing  
*Fall 2006*  
Research on spammers' email address harvesting practices.

**Amit Khanna** College of Computing  
*Fall 2006*  
Implemented Secure BGP (S-BGP) in the Quagga software router. Software publically available and operators are using the codebase for ongoing work on certificates for secure routing.

**Daniel Mentz** College of Computing  
*Spring 2006*  
Research on campus network security troubleshooting.

**Buddy Moore** College of Computing  
*Summer 2006*  
Implemented distributed version of the Infranet anti-censorship software. Publicly available.

## II. RESEARCH AND CREATIVE SCHOLARSHIP

### A. Theses

- A.0.1 Nick Feamster. *Proactive Techniques for Correct and Predictable Internet Routing*. PhD thesis, Massachusetts Institute of Technology, February 2006. Winner of the MIT George M. Sprowls Honorable Mention for Best MIT Ph.D. Dissertation in Computer Science.
- A.0.2 Nick Feamster. Adaptive delivery of real-time streaming video. Master's thesis, Massachusetts Institute of Technology, May 2001. Winner of the MIT EECS William A. Martin Memorial Thesis Award.

### B. Journal Publications

- B.0.1 Bilal Anwer and Nick Feamster. Building a fast, virtualized data plane with programmable hardware. *ACM SIGCOMM Computer Communication Review*, April 2010.
- B.0.2 Nick Feamster, Ramesh Johari, and Hari Balakrishnan. Stable Policy Routing with Provider Independence. *IEEE/ACM Transactions on Networking*, December 2007.
- B.0.3 Nick Feamster and Jennifer Rexford. Network-Wide Prediction of BGP Routes. *IEEE/ACM Transactions on Networking*, June 2007.
- B.0.4 Nick Feamster, Jaeyeon Jung, and Hari Balakrishnan. An Empirical Study of “Bogon” Route Advertisements. *ACM Computer Communications Review*, 35(1):63–70, November 2004.
- B.0.5 Nick Feamster, Jay Borkenhagen, and Jennifer Rexford. Guidelines for Interdomain Traffic Engineering. *ACM Computer Communications Review*, 33(5):19–30, October 2003.

### C. Books and Book Chapters

- C.0.1 Anirudh Ramachandran, Nick Feamster, and David Dagon. *Botnet Detection: Countering the Largest Security Threat*. Springer, 2008. Chapter: Revealing Botnet Membership with DNSBL Counterintelligence.

### D. Refereed Conference Publications

- D.0.1 Bilal Anwer, Murtaza Motiwala, Mukarram bin Tariq, and Nick Feamster. SwitchBlade: A Platform for Rapid Deployment of Network Protocols on Programmable Hardware. In *Proc. ACM SIGCOMM*, New Delhi, India, August 2010.  
*Acceptance rate: 12%*
- D.0.2 Sam Burnett, Nick Feamster, and Santosh Vempala. Chipping Away at Censorship Firewalls with Collage. In *Proc. 19th USENIX Security Symposium*, Washington, DC, August 2010.

- F.3.21 Nick Feamster, Jennifer Rexford, and Jay Borkenhagen. Controlling the impact of BGP policy changes on IP traffic. Technical Report 011106-02, AT&T Labs–Research, Florham Park, NJ, November 2001.
- F.3.22 Russ White, B. Akyol, and Nick Feamster. *Considerations in Validating the Path in Routing Protocols*. IETF, June 2005.

#### F.4. Software

- F.4.1 *Campus-Wide OpenFlow Deployment: Access and Information Flow Control for Enterprise Networks*. Resonance is a system for controlling access and information flow in an enterprise network. Network operators currently use access control systems that are coarse-grained (i.e., it is difficult to apply specialized policy to individual users) and static (i.e., it is difficult to quickly change the extent of a user’s access). Towards fixing these problems, we have developed a system that allows network operators to program network policy using a controller that is distinct from the switch itself and can be programmed to implement network-wide policy. We have implemented and deployed this system in an operational network that spans two buildings on the Georgia Tech campus; the network sees regular use, and a deployment in Georgia Tech dormitories or the wireless network is planned for the near future. We demonstrated the function of this network at the 7th GENI Engineering Conference in March 2010.  
See <http://groups.geni.net/geni/wiki/BGPMux> for details.
- F.4.2 *NANO: Network Access Neutrality Observatory*. The Network Access Neutrality Observatory (NANO) is a system to help users determine whether their traffic is being discriminated against by an access ISP. In contrast to existing systems for detecting network neutrality violations, NANO makes no assumptions about the mechanism for discrimination or the services that the ISP might be discriminated against. NANO has been released in collaboration with Google as part of the Measurement Lab project. A preliminary version of the software was released to a small group of users in March 2009 for testing; a complete release is available for download at: <http://gtnose.net/nano/>.
- F.4.3 *Implementation of GENI Prototype: Virtual Networks and BGP Session Multiplexer*. In the process of developing software for the NSF-Sponsored GENI Project Office. This project (1) adds facilities and functions to the VINI testbed to enable experiments to carry traffic from real users; and (2) increases the experimental use of the VINI testbed by providing a familiar experiment management facility. The deliverables for this project all comprise software for supporting external connectivity and flexible, facile experimentation on the GENI testbed. The primary deliverables are a BGP session multiplexer—a router based on the Quagga software routing suite, software support for virtual tunnel and node creation, and integration of the above functionality with clearinghouse services developed as part of the ProtoGENI project.  
See <http://groups.geni.net/geni/wiki/BGPMux>.  
  
This project contributes to GENI design and prototyping through BGP mux development integration with ISPs; tunnel and topology establishment and management; ProtoGENI clearinghouse integration; and support for isolation and resource swapout. With

researchers at Princeton, we have also built VINI, a large distributed testbed for specifying virtual network topologies and experimenting with routing protocols and architectures in a controlled, realistic emulation environment. See <http://vini-veritas.net/> for details.

- F.4.4 *rcc: router configuration checker*. Static configuration analysis tool for Border Gateway Protocol (BGP) routing configurations. Downloaded by over 100 network operators and many large, nationwide backbone ISPs around the world. See <http://gtnoise.net/rcc/> for details.
- F.4.5 *Infranet*. System for circumventing Web censorship firewalls (e.g., those in China, Saudia Arabia, etc.). Available on Sourceforge. Featured in articles in *Technology Review*, *New Scientist*, and *Slashdot*. See <http://nms.lcs.mit.edu/projects/infranet/>.
- F.4.6 *The Datapostory*. Originally the “MIT BGP Monitor”, the Datapostory is growing to support multiple data feeds (e.g., spam, end-to-end measurement probes, traceroutes, Abilene data, etc.). Currently used by researchers at Georgia Tech, Carnegie Mellon, University of Michigan, Princeton, MIT. See <http://www.datapostory.net/> for details.
- F.4.7 *Secure BGP Implementation*. Implementation of S-BGP in the Quagga software router. Our implementation may be used by Randy Bush and Geoff Huston in their project to develop a certificate infrastructure for secure routing protocols.
- F.4.8 *SR-RTP*. Transport protocol for selective retransmission of packets in an MPEG video stream. Incorporated into “Oxygen TV” for MIT Project Oxygen. Some ideas incorporated into the OpenDivX video transport protocol.

## F.5. Conference Posters and Demos

- F.5.1 Vytautas Valancius, Hyojoon Kim, and Nick Feamster. Transit Portal: BGP Connectivity as a Service. In *Proc. ACM SIGCOMM*, New Delhi, India, August 2010. Demo.
- F.5.2 Sam Burnett, Nick Feamster, and Santosh Vempala. Circumventing Censorship with Collage. In *Proc. ACM SIGCOMM*, New Delhi, India, August 2010. Demo.
- F.5.3 Srikanth Sundaresan, Cristian Lumezanu, Nick Feamster, and Pierre Francois. Traffic Engineering with Self-Configuring Topologies. In *Proc. ACM SIGCOMM*, New Delhi, India, August 2010.
- F.5.4 Anirudh Ramachandran, Yogesh Mundada, Mukarram bin Tariq, and Nick Feamster. Securing Enterprise Networks with Traffic Tainting. In *Proc. ACM SIGCOMM*, Barcelona, Spain, August 2009. Demo.
- F.5.5 Vytautas Valancius, Nick Feamster, Jennifer Rexford, and Aki Nakao. Transit Portal: Bringing Connectivity to the Cloud. In *Proc. ACM SIGCOMM*, Barcelona, Spain, August 2009. Demo.
- F.5.6 Murtaza Motiwala, Megan Elmore, Yogesh Mundada, and Nick Feamster. Network and End-System Support for Transparent Use of Multiple Paths. In *Proc. ACM SIGCOMM*, Barcelona, Spain, August 2009. Demo.
- F.5.7 Sam Burnett, Nick Feamster, and Santosh Vempala. Circumventing Internet Censorship with Collage. In *Proc. 6th Symposium on Networked Systems Design and Implementation (NSDI)*, Boston, MA, April 2009. Demo.

- F.5.8 Anirudh Ramachandran, Kaushik Bhandakar, Mohammed Mukarram bin Tariq, and Nick Feamster. Packets with Provenance. In *Proc. ACM SIGCOMM*, Seattle, WA, August 2008.
- F.5.9 Yogesh Mundada, Murtaza Motiwala, Vytas Valancius, Andy Bavier, Nick Feamster, Larry Peterson, Sapan Bhatia, and Jennifer Rexford. Trinity: A Framework for Managing Wide-Area Virtual Networks. In *Proc. 5th Symposium on Networked Systems Design and Implementation (NSDI)*, San Francisco, CA, April 2008.
- F.5.10 Vytas Valancius and Nick Feamster. Multiplexing BGP Sessions with BGP-Mux. In *3rd International Conference on emerging Networking EXperiments and Technologies (CoNEXT)*, New York, NY, December 2007.
- F.5.11 Nadeem Syed, Nick Feamster, and Alex Gray. Predicting bad behavior. In *NIPS Workshop on Machine Learning in Adversarial Environments for Computer Security*, Whistler, Canada, December 2007.
- F.5.12 Murtaza Motiwala, Andy Bavier, and Nick Feamster. In-Band Network Troubleshooting. In *Proc. Fourth Symposium on Networked Systems Design and Implementation (NSDI)*, Cambridge, MA, April 2007.
- F.5.13 Anirudh Ramachandran and Nick Feamster. Understanding the Network-Level Behavior of Spammers. In *Proc. Third Symposium on Networked Systems Design and Implementation (NSDI)*, San Jose, CA, May 2006.
- F.5.14 Nick Feamster and Hari Balakrishnan. Detecting BGP Configuration Faults with Static Analysis. In *Proc. First Symposium on Networked Systems Design and Implementation (NSDI)*, San Francisco, CA, March 2004.

## G. Research Proposals and Grants (Principal Investigator)

### 1. Approved and Funded

#### G.1.1 GENI OpenFlow Campus Buildout

Sponsor: GENI Project Office  
Investigator(s): N. Feamster (PI), Russ Clark  
Amount: \$64,675 for 1 year  
Awarded: October 2010

#### G.1.2 Architecting for Innovation

Sponsor: National Science Foundation  
Investigator(s): H. Balakrishnan, N. Feamster, B. Godfrey, N. McKeown, J. Rexford, S. Shenker (PI)  
Amount: \$200,000 for 1 year  
Awarded: September 2010

#### G.1.3 Aster\*x: Load-Balancing Web Traffic over Wide-Area Networks

Sponsor: National Science Foundation  
Investigator(s): N. Feamster (PI), Russ Clark  
Amount: \$75,000 for 1 year  
Awarded: August 2010

#### G.1.4 Network-Wide Configuration Testing and Synthesis

Sponsor: National Science Foundation  
Investigator(s): N. Feamster (PI), A. Akella  
Amount: \$500,000 for 3 years  
Awarded: June 2010

- G.1.5 MEDITA - Multi-layer Enterprise-wide Dynamic Information-flow Tracking & Assurance**  
 Sponsor: National Science Foundation  
 Investigator(s): N. Feamster, A. Orso (PI), M. Prvulovic  
 Amount: \$900,000 for 3 years  
 Awarded: March 2010
- G.1.6 Campus Network Access and Admission Control with Openflow**  
 Sponsor: National Science Foundation  
 Investigator(s): N. Feamster (PI), R. Clark  
 Amount: \$300,000 for 3 years  
 Awarded: January 2010
- G.1.7 Studying DNS Traffic Patterns**  
 Sponsor: Verisign  
 Investigator(s): N. Feamster  
 Amount: \$30,000 for 1 year  
 Awarded: November 2009
- G.1.8 CIFellowship for Cristian Lumezanu**  
 Sponsor: National Science Foundation  
 Investigator(s): C. Lumezanu, N. Feamster (PI)  
 Amount: \$140,000 for 1 year  
 Awarded: November 2009
- G.1.9 Military Network Protocol**  
 Sponsor: DARPA Subcontract  
 Investigator(s): N. Feamster  
 Amount: \$37,000 for 1 year  
 Awarded: November 2009
- G.1.10 Botnet Attribution and Removal: From Axioms to Theories to Practice**  
 Sponsor: Office of Naval Research  
 Investigator(s): W. Lee (PI), D. Dagon, J. Giffin, N. Feamster, K. Shin, F. Jahanian, M. Bailey, J. Mitchell, G. Vigna, C. Kruegel  
 Amount: \$7,500,000 for 5 years  
 Awarded: August 2009
- G.1.11 Taint-based Information Tracking in Networked Systems**  
 Sponsor: National Science Foundation Trusted Computing Program  
 Investigator(s): N. Feamster  
 Amount: \$450,000 for 3 years  
 Awarded: August 2009
- G.1.12 Towards a Market for Internet Connectivity**  
 Sponsor: Office of Naval Research  
 Investigator(s): N. Feamster (PI), R. Johari, V. Vazirani  
 Amount: \$350,000 for 1 year  
 Awarded: March 2009
- G.1.13 Bringing Experimenters and External Connectivity to GENI**  
 Sponsor: GENI Project Office  
 Investigator(s): N. Feamster  
 Amount: \$320,000 for 3 years  
 Awarded: September 2008

- G.1.14 **Routing Without Recomputation**  
Sponsor: Cisco Systems  
Investigator(s): N. Feamster  
Amount: \$96,019 for 1 year  
Awarded: September 2008
- G.1.15 **CLEANSE: Cross-Layer Large-Scale Efficient Analysis of Network Activities to Secure the Internet**  
Sponsor: National Science Foundation Cybertrust Program  
Investigator(s): W. Lee (PI), N. Feamster and others  
Amount: \$1,200,000 for 5 years  
Awarded: September 2008
- G.1.16 **Virtual Center for Network and Security Data**  
Sponsor: Department of Homeland Security  
Investigator(s): N. Feamster  
Amount: \$48,000 for 2 years  
Awarded: March 2008
- G.1.17 **Sloan Research Fellowship**  
Sponsor: Alfred P. Sloan Foundation  
Investigator(s): N. Feamster  
Amount: \$45,000 for 2 years  
Awarded: February 2008
- G.1.18 **Enabling Security and Network Management Research for Future Networks**  
Sponsor: National Science Foundation CRI-IAD Program  
Investigator(s): N. Feamster (PI), Z. Mao, W. Lee  
Amount: \$397,426 for 3 years  
Awarded: February 2008
- G.1.19 **SMITE: Scalable Monitoring in the Extreme**  
Sponsor: DARPA BAA 07-52: Scalable Network Monitoring  
Investigator(s): N. Feamster (PI), W. Lee  
Amount: \$250,000 for 2 years  
Awarded: January 2008
- G.1.20 **Countering Botnets: Anomaly-Based Detection, Comprehensive Analysis, and Efficient Mitigation**  
Sponsor: Department of Homeland Security BAA07-09  
Investigator(s): W. Lee (PI), N. Feamster, J. Giffin  
Amount: \$1,050,730 for 2 years  
Awarded: January 2008
- G.1.21 **Spam Filtering Research**  
Sponsor: IBM Faculty Award  
Investigator(s): N. Feamster  
Amount: \$ 7,500 (unrestricted gift)  
Awarded: June 2007
- G.1.22 **SCAN: Statistical Collaborative Analysis of Networks**  
Sponsor: National Science Foundation NeTS-NBD Program  
Investigator(s): N. Feamster (PI), A. Gray, J. Hellerstein, C. Guestrin  
Amount: \$ 95,000 for 3 years.  
Awarded: June 2007

- G.1.23 **Towards an Accountable Internet Architecture**  
Sponsor: National Science Foundation CyberTrust Program (Team Proposal)  
Investigator(s): D. Andersen, H. Balakrishnan, N. Feamster (PI), S. Shenker  
Amount: \$ 300,000 for 3 years.  
Awarded: May 2007
- G.1.24 **Fish4Phish: Fishing for Phishing in a Large Pond**  
Sponsor: AT&T Labs—Research  
Investigator(s): N. Feamster (PI), O. Spatscheck, K. van der Merwe  
Amount: Funding for summer intern.  
Awarded: February 2007
- G.1.25 **Improving Network Operations with a View from the Edge.**  
Sponsor: National Science Foundation CAREER Program  
Investigator(s): N. Feamster (PI)  
Amount: \$400,000 for 5 years.  
Awarded: January 2007
- G.1.26 **Equipment Donation for Network Operations Research**  
Sponsor: Intel Corporation  
Investigator(s): N. Feamster  
Amount: \$30,000  
Awarded: October 2006
- G.1.27 **CABO: Concurrent Architectures are Better than One**  
Sponsor: National Science Foundation NeTS-FIND Program  
Investigator(s): N. Feamster (PI), L. Gao, J. Rexford  
Amount: \$ 300,000 for 4 years  
Awarded: June 2006
- G.1.28 **Verification and Modeling of Wide-Area Internet Routing**  
Sponsor: Cisco Systems University Research Program  
Investigator(s): N. Feamster and H. Balakrishnan (PI)  
Amount: \$ 95,500 for 1 year.  
Awarded: June 2004

## 2. Pending

- G.2.1 **Wide-Area Networking for Distributed Services**  
Sponsor: National Science Foundation CNS Division  
Investigator(s): N. Feamster, J. Rexford  
Amount: \$600,000 for 3 years  
Submitted: September 2010
- G.2.2 **Infrastructure for Home Networking**  
Sponsor: National Science Foundation Computing Research Infrastructure Program  
Investigator(s): N. Feamster, K. Edwards, K. Calvert  
Amount: \$1,200,000 for 3 years  
Submitted: August 2010
- G.2.3 **Automatic Configuration Generation for Data Center Configurations**  
Sponsor: Yahoo Faculty Research and Engagement Program  
Investigator(s): N. Feamster  
Amount: \$25,000 for 1 year  
Submitted: May 2010

#### G.2.4 Managing the Cost of Network Traffic

Sponsor: Yahoo Faculty Research and Engagement Program

Investigator(s): N. Feamster

Amount: \$25,000 for 1 year

Submitted: May 2010

### 3. Not Funded

*Available upon request.*

## H. Research Proposals and Grants (Contributor)

### 1. Approved and Funded

#### H.1.1 Development of a shared network measurement storage and analysis infrastructure

Sponsor: National Science Foundation Major Research Infrastructure (MRI)

Investigator(s): D. Andersen, D. Song, C. Wang, H. Zhang

Amount: \$ 101,488.96

*User and developer for proposed infrastructure; possible equipment money to Georgia Tech .*

*Submitted: February 2006.*

### 2. Pending

### 3. Not Funded

*Available upon request.*

## I. Other

#### I.0.1 In-Band, Bottom-Up Support for Network Accountability

Sponsor: N. Feamster, W. Lee, M. Ahamad

Investigator(s): DARPA Strategic Technology Office

Amount: *White paper / Request for Information.*

*Submitted: February 2007*

#### I.0.2 Towards an Accountable Internet Architecture

Sponsor: D. Andersen, H. Balakrishnan, N. Feamster, S. Shenker

Investigator(s): DARPA Strategic Technology Office

Amount: *White paper / Request for Information.*

*Submitted: February 2007*

## J. Research Honors and Awards

2010	John P. Imlay Distinguished Lecture, Georgia Tech
2010	Panelist for NSF/ <i>Discover Magazine</i> Special Issue on "The New Internet"
2010	<b><i>Technology Review</i> Top Innovators Under 35</b>
2010	Georgia Tech Sigma Xi Young Faculty Award
2009	Best Paper, <i>Passive and Active Measurement Conference</i>
2009	Georgia Tech Sigma Xi Best Undergraduate Research Advisor
2008	<b>NSF Presidential Early Career Award for Scientists and Engineers (PECASE)</b>
2008	<b>Alfred P. Sloan Fellowship</b>

2008	Georgia Tech College of Computing Outstanding Junior Faculty Research Award
2007	IBM Faculty Award
2007	NSF CAREER Award
2006	Best Student Paper (Advisor), <i>ACM SIGCOMM</i> (Premier Networking Conference)
2006	George M. Sprowls honorable mention for best Ph.D. thesis in computer science, MIT
2005	Best Paper, <i>2nd USENIX Symposium on Networked Systems Design and Implementation</i>
2002	Best Student Paper, <i>11th USENIX Security Symposium</i>
2001	Best Student Paper, <i>10th USENIX Security Symposium</i>
2002–2005	NSF Graduate Research Fellow
2001	MIT William A. Martin Memorial Thesis Award for Best EECS Master’s Thesis

### III. SERVICE

#### A. Professional Activities

##### A.1. Memberships and Activities in Professional Societies

Member, ACM Special Interest Group on Data Communications (SIGCOMM)

Member, USENIX Technical Association

##### A.2. Conference Committee Activities

2010	Program Committee, <i>ACM SIGCOMM Poster and Demo Session</i>
2010	Program Committee, <i>ACM SIGCOMM Workshop on Virtualized Infrastructure Systems and Architectures (VISA)</i>
2010	<b>Program Committee Co-Chair</b> , <i>USENIX Workshop on Internet Network Management (INM/WREN)</i>
2010	Program Committee, <i>ACM SIGMETRICS</i>
2010	Program Committee, <i>IEEE Symposium on Internet Security and Privacy</i>
2010	Program Committee, <i>USENIX Symposium on Networked Systems Design and Implementation (NSDI)</i>
2010	Program Committee <i>3rd USENIX Workshop on Large-Scale Exploits and Emergent Threats (LEET '10)</i>
2009	Program Committee, <i>ACM SIGCOMM Workshop on Research on Enterprise Networks (WREN)</i>
2009	Program Committee, <i>ACM SIGCOMM Workshop on Programmable Routers for Extensible Services of Tomorrow (PRESTO)</i>
2009	Program Committee, <i>USENIX Technical Conference</i>
2009	Program Committee, <i>ACM SIGCOMM Workshop on Economics of Networked Systems (NetE-con)</i>
2009	Program Committee <i>2nd USENIX Workshop on Large-Scale Exploits and Emergent Threats (LEET '09)</i>
2009	<b>Poster/Demo Co-Chair</b> , <i>ACM SIGCOMM</i>
2009	Program Committee, <i>ACM SIGMETRICS</i>
2009	Program Committee, <i>6th ACM/USENIX Symposium on Networked Systems Design and Implementation (NSDI)</i>
2008	Program Committee, <i>3rd International Workshop on Real Overlays &amp; Distributed Systems</i>
2008	Program Committee, <i>ACM SIGCOMM Internet Measurement Conference</i>
2008	Program Committee, <i>ACM Conference on Computer and Communications Security (CCS)</i>
2008	Program Committee, <i>ACM SIGCOMM</i>
2008	Program Committee, <i>ACM SIGMETRICS</i>
2008	Program Committee, <i>ACM SIGCOMM Workshop on Programmable Routers for Extensible Services of Tomorrow (PRESTO)</i>
2008	Program Committee, <i>ACM SIGCOMM Workshop on Economics of Networked Systems (NetE-con)</i>

2008	Program Committee, <i>17th International World Wide Web Conference (Security/Privacy Track)</i>
2008	Program Committee, <i>ACM SIGMETRICS Workshop on Internet Network Management</i>
2008	Program Committee, <i>16th IEEE LAN/MAN Workshop</i>
2007	Program Committee, <i>3rd Annual CoNext Conference</i>
2007	Program Committee, <i>ACM SIGCOMM Workshop on Internet Management (INM)</i>
2007	Program Committee, <i>ACM SIGCOMM Student Poster Session</i>
2007	Program Committee, <i>ACM SIGMETRICS Workshop on Mining Internet Data (MineNet)</i>
2007	<b>Co-Organizer</b> , DIMACS Workshop Series on Internet Security
2007	Program Committee, <i>4th Conference on Email and Anti-Spam (CEAS)</i>
2007	Program Committee, <i>3rd USENIX Workshop on Steps to Reduce Unwanted Traffic on the Internet (SRUTI)</i>
2007	Program Committee, <i>USENIX Technical Conference</i>
2007	Program Committee, <i>CoNext</i>
2007	Program Committee, <i>16th International World Wide Web Conference (Security/Privacy Track)</i>
2007	Program Committee Co-Chair, <i>ACM/USENIX Workshop on Networks meet Databases (NetDB)</i>
2006–	Program Committee, <i>North American Network Operators Group (NANOG)</i>
2006	Organizer, <i>Workshop on Internet Routing Evolution and Design</i>
2006	Program Committee, <i>ACM SIGCOMM Internet Measurement Conference</i>
2006	<b>Program Committee Co-Chair</b> , <i>Workshop on the Economics of Networked Systems (NetE-con)</i>
2006	<b>Program Committee Co-Chair</b> , <i>CoNext Student Workshop</i>
2006	Program Committee, <i>2nd Annual CoNext Conference</i>
2006	Program Committee, <i>ACM SIGCOMM Workshop on Internet Network Management</i>
2006	Program Committee, <i>IEEE Symposium on Security and Privacy</i>
2006	Program Committee, <i>IEEE Infocom Student Poster Session</i>
2006	Program Committee, <i>IEEE International Conference on Internet Surveillance and Protection</i>

External reviewer for *IEEE/ACM Transactions on Networking*, *SIGCOMM* (2002, 2003, 2004, 2006, 2007), *SOSP* (2001, 2003), *Infocom* (2004, 2006), *HotNets* (2003), *HotOS* (2001), *USENIX Security Symposium* (2002), *ACM Computer Communication Review*, *IEEE Network Magazine*, *IEEE Journal on Selected Areas in Communications*, *Image Communication (EURASIP)*, *ASPLOS* (2004), *MobiSys* (2004), *USENIX* (2005, 2006), *NSDI* (2005, 2006), *IPTPS* (2005), *Workshop on Privacy Enhancing Technologies* (2006).

### A.3. Workshops and External Courses

Unless otherwise noted, all listed activities are invited speaking invitations for workshops, tutorials, and symposia.

July 2010	Routing for Cloud Services Tutorial, GENI Engineering Conference 8, San Diego, CA
-----------	---

July 2010	Routing for Cloud Services Tutorial, GENI Engineering Workshop, Princeton, NJ
June 2010	African Network Operators Group Tutorial, Kigali, Rwanda
March 2010	<b>Co-Organizer</b> , DIMACS Workshop on Secure Internet Routing, New Brunswick, NJ
June 2009	<b>Organizer</b> , NSF Security Driven Architectures Workshop, Arlington, VA
March 2009	Workshop on Re-Architecting the Internet (NetArch), Monte Verita, Switzerland
February 2009	CAIDA Active Internet Measurement Systems (AIMS) Workshop, San Diego, CA
October 2008	Panelist at IEEE CCW, Steamboat Springs, Colorado
October 2008	Panelist at ACM SIGCOMM Internet Measurement Conference, Athens, Greece
June 2008	Google Workshop on Internet Measurement, Mountain View, CA
May 2008	Tutorial at 26th Brazilian Symposium on Computer Networks and Distributed Systems, Rio de Janeiro, Brazil
March 2008	Co-Organizer for DIMACS Workshop on Secure Internet Routing
November 2007	NSF/DARPA/ARO NCDI Workshop, College Park, MD
August 2007	DIMACS Tutorial on Algorithms for Next Generation Networks, New Brunswick, NJ
July 2007	INTIMATE Workshop on Methods and Tools for Network Analysis, Paris, France
May 2007	Workshop on Programmable Routers for Extensible Services of Tomorrow (PRESTO), Princeton, NJ
April 2007	NeXtworking, the Second COST-NSF Workshop on Future Internet, Berlin, Germany
February 2007	GIG Routing and Addressing Workshop, Washington, DC
February 2007	DARPA Workshop on Assurable Global Networking, Washington, DC
December 2006	Next-Generation Internet Workshop, Lisbon, Portugal
September 2006	Clean Slate Network Research Symposium, Cambridge, UK
October 2006	<b>Co-organizer</b> , Workshop on Internet Routing Evolution and Design (WIRED), Atlanta, GA
August 2006	Cisco Routing Research Symposium, San Jose, CA
June 2006	ARO-DARPA-DHS Special Workshop on Botnets, Arlington, VA
June 2006	Microsoft Research EdgeNet Workshop, Snoqualmie, WA
June 2006	Microsoft Research "Networking on the Edge" Workshop on Network Management, Seattle, WA
February 2006	NSF Workshop on Theory of Networked Computation, Princeton, NJ
January 2006	Cisco Network Management Summit, San Jose, CA

## B. On-Campus Georgia Tech Committees

Spring 2010	Faculty Recruiting Committee
Fall 2009	Strategic Planning Committee
Spring 2009–10	Dean Search Committee
Spring 2009	Faculty Recruiting Committee

Spring 2008	Faculty Recruiting Committee
Fall 2006–	Area Coordinator, Networking Area Group
Fall 2006	Co-Organizer, Networking and Telecommunications Group Open House
Spring 2006–	College of Computing Strategic Planning Committee
Spring 2006	Ph.D. Recruiting Weekend Organizing Committee, CSS Division Leader

## C. Member of Ph.D. Examining Committees

### Ph.D. Thesis Committee

1. David Levin, Department of Computer Science, University of Maryland., Fall 2010.  
*Principal Advisor: Professor Bobby Bhattacharjee.*
2. David Dagon, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Wenke Lee.*
3. Junjie Zhang, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Wenke Lee.*
4. Amogh Dhamdhere, College of Computing, Georgia Tech, Spring 2009.  
*Principal Advisor: Professor Constantine Dovrolis.*
5. Guofei Gu, College of Computing, Georgia Tech, Spring 2008.  
*Principal Advisor: Professor Wenke Lee.*
6. Steve Webb, College of Computing, Georgia Tech, Spring 2008.  
*Principal Advisor: Professor Calton Pu.*
7. Vibhore Kumar, College of Computing, Georgia Tech, Spring 2008.  
*Principal Advisor: Professor Karsten Schwan.*
8. Prahlad Fogla, College of Computing, Georgia Tech, Spring 2007.  
*Principal Advisor: Professor Wenke Lee.*
9. Srinivasan Seetharaman, College of Computing, Georgia Tech, Spring 2007.  
*Principal Advisor: Professor Mostafa Ammar.*
10. Sridhar Srinivasan, College of Computing, Georgia Tech., Spring 2006.  
*Principal Advisor: Professor Ellen Zegura.*
11. Xenofontas Dimitropoulos, Electrical and Computer Engineering, Georgia Tech, Spring 2006.  
*Principal Advisor: Professor George Riley.*
12. Qi Zhao, College of Computing, Georgia Tech, Spring 2006.  
*Principal Advisor: Professor Jim Xu.*
13. Ruomei Gao, College of Computing, Georgia Tech., Fall 2005.  
*Principal Advisor: Professors Ellen Zegura and Constantine Dovrolis.*

### Other — Question writer for Ph.D. Qualifying Exam

1. Bilal Answer, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Nick Feamster.*
2. Sam Burnett, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Nick Feamster.*

3. Shuang Hao, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Nick Feamster.*
4. Partha Kanuparth, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Constantine Dovrolis.*
5. Maria Konte, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Nick Feamster.*
6. Robert Lychev, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Nick Feamster.*
7. Yogesh Mundada, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Nick Feamster.*
8. Cong Shi, College of Computing, Georgia Tech., Spring 2010.  
*Principal Advisor: Professor Mostafa Ammar.*
9. Yiyi Huang, College of Computing, Georgia Tech., Spring 2008.  
*Principal Advisor: Professor Nick Feamster.*
10. Anirudh Ramachandran, College of Computing, Georgia Tech., Spring 2008.  
*Principal Advisor: Professor Nick Feamster.*
11. Murtaza Motiwala, College of Computing, Georgia Tech., Spring 2009.  
*Principal Advisor: Professor Nick Feamster.*
12. Vytautas Valancius, College of Computing, Georgia Tech., Spring 2009.  
*Principal Advisor: Professor Nick Feamster.*
13. Mehmet Demirci, College of Computing, Georgia Tech., Spring 2009.  
*Principal Advisor: Professor Mostafa Ammar.*
14. Ahmed Mansy, College of Computing, Georgia Tech., Spring 2009.  
*Principal Advisor: Professor Mostafa Ammar.*
15. Tonqing Qiu, College of Computing, Georgia Tech., Spring 2009.  
*Principal Advisor: Professor Jim Xu.*
16. Nan Hua, College of Computing, Georgia Tech., Spring 2009.  
*Principal Advisor: Professor Jim Xu.*
17. Chuck Zhao, College of Computing, Georgia Tech., Spring 2009.  
*Principal Advisor: Professor Jim Xu.*
18. Mukarram Bin Tariq, College of Computing, Georgia Tech., Spring 2007.  
*Principal Advisor: Professor Nick Feamster.*
19. Zhenshun Zhang, College of Computing, Georgia Tech., Spring 2007.  
*Principal Advisor: Professor Raghupathy Sivakumar.*
20. Yang Chen, College of Computing, Georgia Tech., Spring 2006.  
*Principal Advisor: Professor Jim Xu.*

#### **D. Consulting, Advisory, and Other External Appointments**

1. Technical Advisory Board, Guavus, Inc. <http://www.guavus.com/>
2. Technical Advisory Board, Anchor Intelligence, Inc. <http://www.fraudwall.net/>
3. Consultant, Damballa, Inc. <http://www.anchorintelligence.com/>

## **E. Research Project Reviewer**

1. National Science Foundation.  
*May 2009*
2. National Science Foundation.  
*July 2008*
3. National Science Foundation.  
*June 2008*
4. National Science Foundation.  
*October 2007*
5. National Science Foundation.  
*March 2007*
6. National Science Foundation.  
*February 2007*
7. Department of Homeland Security.  
*Fall 2006 - Present*  
*Department of Homeland Security Predict Review Board*

## IV. NATIONAL AND INTERNATIONAL RECOGNITION

### A. Invited Conference Session Chair

- April 2010      Session chair, *ACM/USENIX Networked Systems Design and Implementation (NSDI)*, San Jose, CA
- October 2008      Session chair, *ACM SIGCOMM HotNets-VII Workshop*, Calgary, Alberta, Canada
- October 2008      Session chair, *ACM SIGCOMM Internet Measurement Conference*, Athens, Greece
- March 2008      Session organizer, *Security for the Future Internet, NSF Cybertrust PI Meeting*, Arlington, VA
- June 2007      Session chair, *Network Virtualization, NSF NeTS-FIND PI Meeting*, Arlington, VA
- June 2006      Session chair, *Mechanism Design and Networking, First Workshop on the Economics of Networked Systems (NetEcon06)*, Ann Arbor, MI

### B. Patents

- March 2007      “Method and System for Detecting and Responding to Attacking Networks”, U.S. Patent Application # 11/538,212

### C. Editorial and Reviewer Work for Technical Journals and Publishers

- External reviewer for *IEEE/ACM Transactions on Networking*
- External reviewer for *IEEE Journal on Selected Areas in Communications*
- External reviewer for *IEEE Computer Networks*
- External reviewer for *ACM Transactions on Information and Systems Security*

## V. OTHER CONTRIBUTIONS

### A. Seminar Presentations

- A.0.1      Challenges and Opportunities for Tomorrow’s Networks. In *John P. Imlay Distinguished Lecture*, Atlanta, GA, October 2010.
- A.0.2      SwitchBlade: A Platform for Rapid Deployment of Network Protocols on Programmable Hardware. In *ACM SIGCOMM*, New Delhi, India, September 2010.
- A.0.3      Outsourcing Home Network Security. In *ACM SIGCOMM Workshop on Home Networking (HomeNets)*, New Delhi, India, September 2010.
- A.0.4      Challenges and Opportunities in Home Network Measurement. In *ACM SIGCOMM Workshop on Home Networking (HomeNets)*, New Delhi, India, September 2010. Panel Discussion.
- A.0.5      Wide-Area Routing for Distributed Services. In *GENI Experimenters Workshop*, Princeton, NJ, June 2010.
- A.0.6      Wide-Area Routing for Distributed Services: Tutorial. In *GENI Engineering Conference 8*, San Diego, CA, July 2010.
- A.0.7      Network-Level Spam and Scam Defenses. In *African Network Operators Group*, Kigali, Rwanda, June 2010.

- A.0.8 SwitchBlade: A Platform for Rapid Deployment of Network Protocols on Programmable Hardware. In *National Institute of Information and Communications Technology*, Tokyo, Japan, June 2010.
- A.0.9 Network-Level Spam and Scam Defenses. In *National Institute of Information and Communications Technology*, Tokyo, Japan, June 2010.
- A.0.10 Wide-Area Routing for Distributed Services. In *University of Tokyo*, Tokyo, Japan, June 2010.
- A.0.11 SwitchBlade: A Platform for Rapid Deployment of Network Protocols on Programmable Hardware. In *Stanford Networking Seminar*, Stanford, CA, June 2010.
- A.0.12 Network-Level Spam and Scam Defenses. In *MIT Computer Science Department Colloquium*, Cambridge, MA, May 2010.
- A.0.13 Network-Level Spam and Scam Defenses. In *Harvard University Computer Science Department Colloquium*, Cambridge, MA, April 2010.
- A.0.14 Network-Layer Support for Secure Routing and Access Control. In *DIMACS Workshop on Secure Routing*, New Brunswick, NJ, March 2010.
- A.0.15 Detecting General Network Neutrality Violations with Causal Inference. In *ACM SIGCOMM CoNext*, Rome, Italy, December 2009.
- A.0.16 Dynamic Access Control with Resonance. In *DIMACS Workshop on Network Management*, New Brunswick, NJ, November 2009.
- A.0.17 Network-Level Spam and Scam Defenses. In *Princeton University Computer Science Department Colloquium*, Princeton, NJ, October 2009.
- A.0.18 SNARE: Spatio-Temporal Network-Level Automated Reputation Engine. In *Message Anti-Abuse Working Group (MAAWG) Plenary Session*, Philadelphia, PA, October 2009.
- A.0.19 A Platform for Building Flexible, Fast Virtual Networks on Commodity Hardware. In *Cisco Routing Architecture Workshop*, San Jose, CA, October 2009.
- A.0.20 Network-Level Spam and Scam Defenses. In *EPFL Summer Research Institute*, Lausanne, Switzerland, June 2009.
- A.0.21 Bringing Experimenters and External Connectivity to GENI. In *GENI Measurement Workshop*, Madison, WI, June 2009.
- A.0.22 Network-Level Spam Defenses. In *University of Wisconsin Computer Science Department Colloquium*, Madison, WI, April 2009.
- A.0.23 Trellis: A Platform for Building Flexible, Fast Virtual Networks on Commodity Hardware. In *NSF NeTS FIND PI Meeting*, Arlington, VA, April 2009.
- A.0.24 Dynamics of Online Scam Hosting Infrastructure. In *Passive and Active Measurement Conference*, Seoul, Korea, April 2009.
- A.0.25 Demonstration of Topology Creation Service and BGP Session Multiplexer. In *4th GENI Engineering Conference*, Miami, Florida, April 2009.
- A.0.26 Network Security Research. In *Georgia Tech College of Computing Wine & Cheese Talk*, Atlanta, GA, April 2009.

- A.0.27 Network-Level Spam Defenses. In *Cisco Systems Security Seminar*, San Jose, CA, March 2009.
- A.0.28 Network-Level Spam Defenses. In *Stanford University Networking Seminar*, Stanford, CA, March 2009.
- A.0.29 Network-Level Spam Defenses. In *University of North Carolina Computer Science Department Colloquium*, Chapel Hill, NC, March 2009.
- A.0.30 Dynamics of Online Scam Hosting Infrastructure. In *CAIDA Active Internet Measurement Systems (AIMS) Workshop*, San Diego, CA, February 2009.
- A.0.31 Outsourcing Network Security with Programmable Hardware. In *GENI Security Workshop*, Davis, CA, April 2009.
- A.0.32 Spam, Phishing, and Online Scams:  
A View from the Network-Level. In *University of Toronto Computer Science Department Colloquium*, Toronto, Ontario, Canada, December 2008.
- A.0.33 Detecting and Diagnosing Network Performance Degradations with Statistical Methods. In *IPAM Workshop on New Mathematical Frontiers in Network Multi-Resolution Analysis*, Los Angeles, CA, October 2008.
- A.0.34 Fighting Spam, Phishing, and Online Scams at the Network Level. In *Asian Internet Engineering Conference*, Bangkok, Thailand, November 2008.
- A.0.35 Multiplexing BGP Sessions with a BGP Session Multiplexer. In *3rd GENI Engineering Conference*, Palo Alto, CA, October 2008.
- A.0.36 Towards an Accountable Internet Architecture. In *The IEEE 22nd Annual Computer Communications Workshop*, Steamboat Springs, Colorado, October 2008.
- A.0.37 Network-Level Spam Filtering. In *IPAM Workshop on Applications of Internet MRA to Cyber-Security*, Los Angeles, CA, October 2008.
- A.0.38 Spam, Phishing, and Online Scams:  
A View from the Network-Level. In *Yahoo Tech Talk*, Sunnyvale, CA, August 2008.
- A.0.39 Path Splicing. In *EPFL Summer Research Institute*, Lausanne, Switzerland, July 2008.
- A.0.40 Spam, Phishing, and Online Scams:  
A View from the Network-Level. In *Google Tech Talk*, Mountain View, CA, June 2008.  
<http://www.youtube.com/watch?v=IBPg9Lyta3A>.
- A.0.41 Making Tomography Practical: Scalable Network Monitoring for Fault Diagnosis. In *DIMACS Workshop on Network Tomography*, New Brunswick, NJ, May 2008.
- A.0.42 Network-Based Spam Filtering. In *Internet2 Members Meeting*, Arlington, VA, April 2008.
- A.0.43 Path Splicing. In *Carnegie Mellon University Computer Science Seminar*, Pittsburgh, PA, April 2008.
- A.0.44 BGP, Bogons, and Spam. In *DIMACS Workshop on Secure Internet Routing*, New Brunswick, NJ, March 2008.
- A.0.45 Can Great Research Be Taught? Independent Research with Cross-Disciplinary Thinking and Broader Impact. In *ACM SIGCSE Technical Symposium on Computer Science Education (SIGCSE)*, Portland, OR, March 2008.

- A.0.46 Path Splicing. In *Colgate University Computer Science Seminar*, Hamilton, NY, November 2007.
- A.0.47 Path Splicing. In *Cornell University Computer Science Symposium*, Ithaca, NY, November 2007.
- A.0.48 Path Splicing. In *Bell Labs Networking Seminar*, Murray Hill, NJ, November 2007.
- A.0.49 Usage-Based DHCP Lease-Time Optimization. In *ACM/USENIX Internet Measurement Conference*, San Diego, CA, October 2007.
- A.0.50 Network-Based Spam Filtering. In *University of Southern California Computer Science Symposium*, Los Angeles, CA, October 2007.
- A.0.51 Path Splicing with Network Slicing. In *Georgia Tech Algorithms and Randomness Center (ARC) Symposium*, Atlanta, GA, October 2007.
- A.0.52 Internet Availability. In *DIMACS Tutorial on Algorithms for Next-Generation Networks*, New Brunswick, NJ, August 2007.
- A.0.53 Towards an Accountable Internet Architecture. In *INTIMATE Workshop on Methods and Tools for Network Analysis*, Paris, France, July 2007.
- A.0.54 Path Splicing with Network Slicing. In *UCL Networking Seminar*, Louvain La Neuve, Belgium, July 2007.
- A.0.55 Composing Virtual Networks. In *Third NSF-NeTS FIND PI Meeting*, Arlington, VA, June 2007.
- A.0.56 Path Splicing with Network Slicing. In *UCSD Networking and Systems Seminar*, San Diego, CA, June 2007.
- A.0.57 Path Splicing with Network Slicing. In *NANOG 40*, Bellevue, WA, June 2007.
- A.0.58 AGORA: A Market for Internet Connectivity. In *Workshop on Programmable Routers for Extensible Services of Tomorrow*, Princeton, NJ, May 2007.
- A.0.59 Path Splicing with Network Slicing. In *NeXtworking 2007, the Second COST-NSF Workshop on Future Internet*, Berlin, Germany, April 2007.
- A.0.60 Towards an Accountable Internet Architecture. In *DARPA GIG Routing and Addressing Workshop*, Arlington, VA, February 2007.
- A.0.61 Towards an Accountable Internet Architecture. In *DARPA STO Assurable Global Networking Workshop*, Arlington, VA, February 2007.
- A.0.62 Improving Network Operations with a View from the Edge. In *National Science Foundation CyberTrust PI Meeting*, Atlanta, GA, January 2007.
- A.0.63 Network Virtualization for Experimentation and Profit. In *University of Michigan Networking Seminar*, Ann Arbor, MI, December 2006.
- A.0.64 Network Virtualization for Experimentation and Profit. In *Stanford Networking Seminar*, Stanford, CA, November 2006.
- A.0.65 Network Architecture Research. In *National Science Foundation NeTS-FIND Informational Meeting*, Reston, VA, November 2006.
- A.0.66 Network Virtualization. In *National Science Foundation NeTS-FIND PI Meeting*, Reston, VA, November 2006.

- A.0.67 Understanding the Network-Level Behavior of Spammers. In *Johns Hopkins Security and Applied Research Lab Seminar*, Baltimore, MD, October 2006.
- A.0.68 Revealing Botnet Membership with DNSBL Counter-Intelligence. In *NANOG 38*, St. Louis, MO, October 2006.
- A.0.69 VINI: A Virtual Network Infrastructure. In *Centre national de la recherche scientifique (CNRS)*, Paris, France, September 2006.
- A.0.70 Botnets and Spam. In *Seminar: Laboratoire d'informatique de Paris 6*, Paris, France, September 2006.
- A.0.71 Network Virtualization and Graph Embedding. In *Georgia Tech Algorithms and Randomness Center Seminar*, Atlanta, GA, September 2006.
- A.0.72 Cabo: Concurrent Architectures are Better than One. In *Cisco Internet Routing Research Symposium*, San Jose, CA, August 2006.
- A.0.73 Botnets and Spam. In *ARO-DARPA-DHS Special Workshop on Botnets*, Arlington, VA, June 2006.
- A.0.74 Understanding the Network-Level Behavior of Spammers. In *CS 548: Internet and Distributed Systems Seminar*, Stanford, CA, June 2006.
- A.0.75 Understanding the Network-Level Behavior of Spammers. In *NANOG 37*, San Jose, CA, June 2006.
- A.0.76 Campus and Personal Network Troubleshooting. In *Microsoft Research EdgeNet 2006*, Snoqualmie, WA, June 2006.
- A.0.77 Infranet: Circumventing Web censorship and surveillance. In *Georgia Tech NTG Seminar*, Atlanta, GA, April 2006.
- A.0.78 Filtering: Sharpening Two Sides of a Double-Edged Sword. In *Interzone 5*, Tucker, GA, March 2006.
- A.0.79 Theory of Measurement and Monitoring. In *Workshop on the Theory of Networked Computation*, Princeton, NJ, February 2006.
- A.0.80 Challenges and Opportunities in Internet Data Mining. In *Cisco Network Management Summit*, San Jose, CA, February 2006.
- A.0.81 BGP Spamming Agility. In *NANOG 36*, Dallas, TX, February 2006.
- A.0.82 Spam Forensics. In *IEEE Security and Privacy Crystal Ball Workshop*, Berkeley, CA, February 2006.
- A.0.83 Network Security. In *Georgia Tech Information Security Center Lunch*, Atlanta, GA, January 2006.
- A.0.84 Geographic Locality of IP Prefixes. In *NANOG 35*, Los Angeles, CA, October 2005.
- A.0.85 rcc demonstration. In *NANOG 35*, Los Angeles, CA, October 2005.
- A.0.86 Detecting BGP Configuration Faults with Static Analysis. In *Princeton University Systems Reading Group*, Princeton, NJ, October 2005.
- A.0.87 Proactive Techniques for Correct and Predictable Internet Routing. In *University of Cambridge Symposium*, England, United Kingdom, June 2005.

- A.0.88 Proactive Techniques for Correct and Predictable Internet Routing. In *Hewlett-Packard Laboratories*, Palo Alto, CA, October 2005.
- A.0.89 Open problems in BGP anomaly detection. In *CAIDA Workshop on Internet Signal Processing*, San Diego, CA, November 2004.
- A.0.90 On end-to-end path failures and routing instability. In *CAIDA Workshop on Internet Signal Processing*, San Diego, CA, November 2004.
- A.0.91 Wide-area network data and analysis at MIT. In *CAIDA Internet Measurement Data Catalog Workshop*, San Diego, CA, June 2004.
- A.0.92 Verifying wide-area routing configuration. In *NANOG 31*, San Francisco, CA, May 2004.
- A.0.93 Verifying wide-area routing configuration with *rcc*. AT&T Labs; Florham Park, NJ, February 2004.
- A.0.94 Verifying wide-area routing configuration with *rcc*. In *NYU Systems Reading Group*, New York, NY, February 2004.
- A.0.95 A systematic approach to BGP configuration checking. In *NANOG 29*, Chicago, IL, October 2003.
- A.0.96 Characterizing path failures: Location, characterization, correlation. In *CAIDA Internet Statistics, Metrics, and Analysis Workshop*, Leiden, The Netherlands, October 2002.
- A.0.97 Infranet: Circumventing Web censorship and surveillance. In *Harvard Kennedy School of Government Seminar*, Cambridge, MA, November 2002.
- A.0.98 Infranet: Circumventing Web censorship and surveillance. Hewlett-Packard Laboratories; Palo Alto, CA, August 2002.
- A.0.99 Infranet: Circumventing Web censorship and surveillance. In *Carnegie Mellon University SDI Seminar*, Pittsburgh, PA, April 2002.
- A.0.100 Controlling the impact of BGP policy changes on IP traffic. In *NANOG 25*, Toronto, Ontario, Canada, June 2002.

## VI. PERSONAL DATA

Born: Stanford, CA  
Home Address: Atlanta, GA 30308-1490  
Citizenship: USA
