EDUCATIONAL BACKGROUND

Degree	Year	University	Field
Ph.D.	2005	Massachusetts Institute of Technology Cambridge, MA <i>Dissertation:</i> Proactive Techniques for Correct and Predictable Internet Routing <i>Sprolws Honorable Mention for best MIT Ph.D. dissertation in Computer Science</i> <i>Advisor:</i> Hari Balakrishnan Minor in Game Theory	Computer Science
M.Eng.	2001	Massachusetts Institute of Technology Cambridge, MA <i>Dissertation:</i> Adaptive Delivery of Real-Time Streaming Video <i>Advisor:</i> Hari Balakrishnan <i>William A. Martin Memorial Thesis Award</i> (MIT M.Eng. thesis award)	Computer Science
S.B.	2000	Massachusetts Institute of Technology Cambridge, MA	Electrical Engineering and Computer Science

EMPLOYMENT HISTORY

Title	Organization	Years
Associate Professor	Georgia Institute of Technology	March 2011–Present
Associate Professor	University of Maryland College Park	August 2012–December 2012
Assistant Professor	Georgia Institute of Technology	2006–2011
Postdoctoral Research Staff	Princeton University	Fall 2005
Research Assistant	Massachusetts Institute of Technology	2000–2005
Intern/Consultant	AT&T Labs–Research	2001–2005
Technical Associate	Bell Laboratories	1999
Intern	Hewlett-Packard Laboratories	1999
Technical Staff	LookSmart, Ltd.	1997

CURRENT FIELDS OF INTEREST

My research focuses on networked computer systems, with a strong emphasis on network architecture and protocol design; network security, management, and measurement; routing; and anti-censorship techniques. The primary goal of my research is to help network operators run their networks better, and to enable users of these networks (both public and private) to experience high availability and good end-to-end performance. I have a strong interest in tackling practical problems using a “first principles” approach, designing systems based on these principles, and implementing and deploying these systems in practice.

I. TEACHING

A. Courses Taught

Term	Year	Number of Course Number & Title	Students	Comments
Fall	2013	CS 8001 Software Defined Networking	15	Flipped classroom
Fall	2013	CS 7001 Introduction to Graduate Studies	36	New blog
Summer	2013	Software Defined Networking (Coursera)	50,000+	First SDN Course
Spring	2013	CS 3251 Computer Networking	82	
Fall	2012	CMSC 330 Programming Languages	100	
Fall	2011	CS 6250 Computer Networking	51	
Fall	2011	CS 4235 Computer Security	44	
Fall	2010	CS 6250 Computer Networking	92	
Spring	2010	CS 3251 Computer Networking I	53	
Spring	2010	CS 8803 NGN Next Generation Networking	50	New Course
Fall	2009	CS 7001 Introduction to Graduate Studies	39	
Spring	2009	CS 6262 Network Security	45	Updated Syllabus
Fall	2008	CS 4251 Computer Networking II	16	
Fall	2008	CS 7001 Introduction to Graduate Studies	44	
Spring	2008	CS 4251 Computer Networking II	14	New Syllabus
Fall	2007	CS 7001 Introduction to Graduate Studies	53	
Spring	2007	CS 7260 Internetworking Protocols and Architectures	29	
Fall	2006	CS 7001 Introduction to Graduate Studies	74	New Syllabus
Fall	2006	CS 8001 Networking Research Seminar	30	New Syllabus
Fall	2006	CS 1100 Freshman Leap Seminar	15	
Spring	2006	CS 7260 Internetworking Protocols and Architectures	27	New Syllabus

Other Highlights: Created the first-ever course on Software Defined Networking (SDN), and delivered it on Coursera to over 50,000 enrolled students

Tutorial on network measurement at African Network Operators Group (AfNOG) in Summer 2013.

Guest lecture on Internet censorship in Georgia Tech CS 4001 in October 2011.

Tutorial on software-defined networking at African Network Operators Group (AfNOG) in Summer 2011.

Tutorials on BGP Multiplexer at GENI Experimenters Workshop and

GENI Engineering Conference in Summer 2010.

Tutorial on network security at African Network Operators Group (AfNOG) in Summer 2010.

Tutorial on Internet routing at Simposio Brasileiro de Redes de Computadores (SBRC) in Summer 2008.

Lecture for DIMACS Tutorial on Next-Generation Internet Routing Algorithms in August 2007.

Guest lecture for CS 6250 (Advanced Computer Networks) in Fall 2007.

Guest lecture for CS 3251 (Computer Networks I) in Fall 2006.

Multiple guest lectures for CS 4251 (Computer Networks II) in Spring 2006.

Guest lecture for MIT Course 6.829 (Computer Networking) in Fall 2005.

B. Curriculum Development

B.1. Creation of New Content

Coursera and Online Masters Program Development: I have developed an online Coursera course for the topic of Software Defined Networking (SDN), an emerging topic in computer networking that is reshaping how networks are defined. In the course, students learn about the history of SDN and develop

hands-on experience with tools to develop technologies and applications for SDN. The course had approximately 50,00 students enrolled, and had about 4,000 students actively participating on the forums and in lectures. Nearly 1,000 students successfully completed the programming assignments for the course, qualifying as a pass “with distinction”. The course reviewed extremely favorably from students, as we have documented here: <http://goo.gl/So7Uis>. Additionally, the success of the course was covered on many technical forums, including the Mininet blog (<http://goo.gl/ZqfL1N>), the Packet Pushers blog (<http://goo.gl/okzd44>), and the sFlow blog (<http://goo.gl/qSMCq0>). Based on its overwhelming success, the course will be offered again in May 2014.

Georgia Tech Online Masters Program: I served on the committee to develop a Master of Science in Computer Science degree based on Massive Open Online Course (MOOC) offerings and took an active role in ensuring the creation of the online degree at Georgia Tech. As of October 2013, I am currently working with Udacity and Georgia Tech to create the first online graduate course in computer networking, which will launch in January 2014 and become an integral part of the Georgia Tech online degree program.

CS 7001 Introduction to Graduate Studies: With Professor Alex Gray, I have developed a new course syllabus and structure to CS 7001 around the larger goal of introducing new students to *how to do great research* as soon as their first term at Georgia Tech. In contrast with previous terms, where CS 7001 consisted of faculty “advertisements” for their research and projects consisted of short “mini-projects” where little research could be accomplished in a short time span of 3 weeks, we have improved the syllabus by bringing in faculty members to talk about research philosophy, exciting new directions, etc. We have also given the students the option to do a research project that is a term-long project in conjunction with CS 8903; our goal is to give students the flexibility to select meaningful research problems based on their research assistantships while helping them learn the skills required for writing papers, finding and evaluating research ideas, and performing other tasks associated with doing great research. Alex Gray and I wrote a conference paper on our development of this course, which appeared at *ACM SIGCSE 2008*. We have developed a website for the course, greatresearch.org, which makes the material generally available for use at other universities and by other researchers. **The website and blog have more than 25,000 views since its launch in mid-August 2013, and it has been receiving about 10,000 views every month.**

CS 6250 Graduate Computer Networking: In Fall 2011, I redesigned the graduate computer networking course to focus more on current technologies and hands-on assignments. Conventional networking courses treat today’s protocols and mechanisms as fixed artifacts, rather than as part of a continually evolving system. To prepare students to think critically about Internet architecture, Jennifer Rexford and I created a graduate networking course that combines “clean slate” networking research with hands-on experience in analyzing, building, and extending real networks. My goal was to prepare students to create and explore new architectural ideas, while teaching them the platforms and tools needed to evaluate their designs in practice. The course, with offerings at both Georgia Tech and Princeton, focuses on network management as a concrete way to explore different ways to split functionality across the end hosts, network elements, and management systems. I have refined the course in Fall 2011 to include more hands-on assignments and refactored the course around networking problems in different types of networks: transit networks, home networks, content hosting networks, and mobile and wireless networks. **Our work on the course received the best paper at the ACM SIGCOMM Workshop on Networking Education (NetEd) in 2011.**

College of Computing Research Day and Seminar Series: In addition to the course itself, to fulfill some of the functions of the former 7001 course, Alex Gray and I financed and organized a college-wide seminar series and research day in Fall 2009 and again in Spring 2011. Throughout the term, faculty speakers from across the college gave one-hour talks about their research; we raised money from Yahoo to support this event. The research day brings together students and faculty from around the college to see talks, demonstrations, and posters from around the college to exchange ideas.

CS 8803 Next-Generation Networking: I developed a new graduate course that gives students practical experience with a variety of tools for next-generation networking, ranging from the Click software router to the OpenFlow switch framework. The course also teaches students about the state of the art in networking research—students read papers about research and industry trends and do a course project that incorporates aspects of these new technologies. This course relates to the larger nationwide effort on Global Environment for Network Innovations (GENI), which is building infrastructure for researchers to provide the next generation of networking protocols and technologies.

B.2. Revision of Existing Content

CS 4251 Computer Networking II: *Spring/Fall 2008.* I developed new hands-on assignments to give students experience with real-world networking tools and software (*e.g.*, Emulab, Quagga, Click). I also revamped the course around various high-level themes in networking, including layering, resource sharing, and tree formation (routing and forwarding, etc.). Finally, I developed over 20 new lectures for the syllabus, as well as new problem sets which can be re-used for future offerings of the course.

CS 6262 Network Security: *Spring 2009.* I updated the syllabus to include recent network attacks (*e.g.*, spam, botnets, reflection attacks, etc.) and also to integrate more hands-on assignments. Updating problem sets and project lists.

CS 7260 Internetworking Architectures and Protocols: *Spring 2006.* I developed a new project-based graduate course with substantial programming assignments using a wide variety of state-of-the-art networking software tools and platforms (*e.g.*, rcc, PlanetLab, scriptroute, NetFlow, etc.). I contributed questions to a larger bank of questions also used in graduate-level networking courses at Carnegie Mellon and MIT. Finally, I developed 24 new lectures, many based on current “hot topics” in computer networking (*e.g.*, spam, botnets, traffic anomaly detection, etc.)

Spring 2007. I developed two new course modules: (1) sound techniques for network measurement; and (2) evaluation platforms (Emulab, VINI, etc.). I designed new problem sets on these topics. With faculty at Carnegie Mellon, I instituted the use of a cross-institutional online forum for paper discussion. Students read papers from the CS 7260 syllabus and commented on papers before class to help stimulate paper discussion; students also read the discussion blog and could comment on papers being discussed in networking classes at other schools.

C. Individual Student Guidance

C.1. Postdocs and Research Scientists Supervised

Dave Levin Department of Computer Science

Fall 2012 -

Various networking systems research topics, including wireless networking and software defined networking.

Stephen Woodrow College of Computing

Spring 2011 - Summer 2012

Research on the performance of Internet access networks and development for the BISmark project.

Stephen is now at Stripe, a bay area startup.

Nazanin Magharei College of Computing

Spring 2011 - Spring 2012

Research on the performance of Internet access networks.

Nazanin is now a full-time employee at Cisco Systems.

Cristian Lumezanu College of Computing
Fall 2009 - Fall 2011
Publications: *D.0.8, D.0.10 D.0.14,*
Research on Internet measurement and economics.
Cristian is now a researcher at NEC Research Labs.

C.2. Ph.D. Students Supervised

Arpit Gupta Department of Computer Science
Fall 2013 - Present

Ben Jones Department of Computer Science
Fall 2013 - Present

Sean Donovan Department of Computer Science
Fall 2013 - Present

Swati Roy Department of Computer Science
Fall 2013 - Present

Sarthak Grover Department of Computer Science
Fall 2012 - Present

Muhammad Shahbaz Department of Computer Science
Fall 2012 - Present

Abhinav Narain Department of Computer Science
Fall 2011 - Present
Research on performance of home wireless networks.

Xinyu Xing College of Computing
Fall 2011 - Present
Publications: *D.0.6*
Research on anti-censorship.

Hyojoon Kim College of Computing
Fall 2009 - Present
Publications: *D.0.12, F.5.4*
Research on programmable networks and network configuration.
Passed qualifier.

Bilal Anwer College of Computing
Fall 2008 - Present
Publications: *F.2.7, B.0.12, D.0.17, E.0.10, E.0.13*
Research on support for hardware forwarding in virtual network environments.
Passed qualifier.

Yogesh Mundada College of Computing
Fall 2007 - Present
Publications: *E.0.9, F.3.8, F.5.14*

*Research on a data-leak prevention system for Web applications. Development of experiment specification for VINI and integration of VINI with Emulab.
Passed qualifier.*

Robert Lychev College of Computing

Fall 2008 - Present

Research on contract enforcement for transit markets.

Passed qualifier.

Sam Burnett College of Computing

Fall 2008 - Present

Publications: D.0.18, F.5.7, F.5.12

Design and implementation of anti-censorship systems.

Passed qualifier.

Srikanth Sundaresan College of Computing

Fall 2008 - Present

Publications: B.0.4, D.0.15, E.0.7, F.5.3, F.5.8, F.2.10, F.2.8

Research on access network performance and online traffic engineering.

Passed thesis proposal.

Shuang Hao College of Computing

Fall 2007 - Present

Publications: D.0.13 D.0.25

Research on botnet detection, network monitoring, and spam filtering.

Passed qualifier.

Maria Konte College of Computing

Fall 2007 - Present

Publications: D.0.11, D.0.26, F.5.5

Measurement study of fast-flux networks.

Passed qualifier.

Vytautas Valancius College of Computing

Summer 2007 - Spring 2012

Publications: D.0.9 D.0.14, D.0.20, E.0.16, E.0.15, F.3.6, F.3.8, F.3.11, F.5.6 F.5.14, F.5.15

Research on interdomain routing and network virtualization.

Graduated, now at Google.

Murtaza Motiwala College of Computing

Fall 2006 - Spring 2012

Publications: B.0.7, D.0.28, E.0.20, F.3.8, F.3.10, F.3.14, F.5.14

Research on (1) in-band troubleshooting and (2) scalable network architectures for path diversity, including path splicing.

Graduated, now at Google.

Mukarram Bin Tariq College of Computing

Spring 2007 - Spring 2010

Publications: D.0.29, D.0.23, D.0.22, E.0.17, B.0.3, F.3.7

Co-advised with Mostafa Ammar. Research on statistical inference methods for network planning and troubleshooting problems. Mukarram's dissertation work is now part of operational systems at Google.

Graduated. Now at Google in the network monitoring group.

Anirudh Ramachandran College of Computing

Spring 2006 - Present

Publications: C.0.1, D.0.16 D.0.32, D.0.37, E.0.19, E.0.22, E.0.23, E.0.24, F.3.4, F.3.7, F.5.13, F.5.18
Research on network-level behavior of spammers and passive botnet detection.

Graduated; winner of the Georgia Tech Dissertation Award. Now the founder of a data-leak prevention startup, Nouvou.

C.3. Masters Students Supervised

Sachit Muckaden College of Computing

Spring 2013

Mobile performance measurement, development of MySpeedTest, and Android-based mobile performance measurement tool that is now in widespread use across 130 countries.

Swati Roy Electrical and Computer Engineering

Fall 2012-Spring 2013

Publications: F.5.1

Study of correlated latency spikes in home networks.

Abhishek Jain College of Computing

Fall 2011 - Fall 2012

Design and implementation of networkdashboard.org, a front end Web interface for network data gathered from home networks.

Ankur Nayak College of Computing

Spring 2009 - Spring 2010

Publications: E.0.14

Dynamic access control with programmable switches.

Umayr Hassan College of Computing

Fall 2008 - Spring 2010

Research on the design of a market for Internet transit, and on home network configuration.

Umayr now works full-time at Bloomberg.

Nadeem Syed College of Computing

Spring 2007 - Spring 2008

Publications: F.5.16

Co-advised with Alex Gray. Developing and implementing new machine learning techniques for fast disruption detection.

Nadeem is in the MBA program at Georgia Tech.

Kaushik Bhandakar College of Computing

Spring 2007 - Summer 2008

Publications: F.5.13

Experiments for VINI performance benchmarking; implementation and prototyping for the “Pedigree” packet provenance project; research on incentives in BitTorrent.

Kaushik now works full-time at Google.

Samantha Lo Hong Kong Polytechnic University

Spring 2007

Research on market-based network architectures and inbound traffic engineering.

Samantha is now a Ph.D. student at Georgia Tech.

Manas Khadilkar College of Computing

Fall 2006 - Spring 2007

Publications: D.0.33

Research on efficient settings of lease times for DHCP address allocation. Algorithm in development, to be used on the Georgia Tech campus network for optimizing lease time settings.
Manas now works full-time for Expedia.

Han Lu College of Computing
Fall 2006 - Spring 2007
Research on spam traffic patterns by IP address space.

Chris Kelly College of Computing
Fall 2006 - Fall 2007
Developing new software features for the Campus-Wide Performance Monitoring and Recovery (CPR) project.
Chris now works full-time for SugarCRM, an Atlanta-based startup.

Yiyi Huang College of Computing
Spring 2006 - Fall 2009
Publications: *D.0.34, F.3.5*
Co-advised with Jim Xu. Research on fast, distributed network anomaly detection.
Yiyi now works full-time at Microsoft.

Winston Wang M.I.T. EECS
Fall 2002 - Spring 2003
Publications: *E.0.28*
Thesis on an implementation of the Infranet anti-censorship system received MIT's Charles and Jennifer Johnson Thesis Prize.

C.4. Undergraduate Students Supervised

Jake Martin College of Computing
Spring 2012
Publications: *E.0.6*
Research on prioritizing application traffic in home networks

Michael Dandy College of Computing
Summer 2012 - Fall 2012
Publications: *F.2.9*
Design of usage cap management interface for the BISmark platform. Study of incentive schemes for encouraging users to shift traffic demands to off-peak hours.

Andrew Kahn Department of Computer Science, Northwestern University
Summer 2012
Design and implementation of a captive portal system for the BISmark home router platform.

Alex Wong College of Computing
Summer 2012
Design and implementation of networkdashboard.org, a front end Web interface for network data gathered from home networks.

Alfred Roberts College of Computing
Fall 2011 - Present
Design and implementation of networkdashboard.org, a front end Web interface for network data gathered from home networks.

Alex Reimers College of Computing
Spring 2009
Publications: *E.0.14*

Worked on dynamic access control (a replacement of Georgia Tech OIT's current authentication system) with programmable switches.

Alex now works full time at BigSwitch, an OpenFlow-based startup.

Megan Elmore College of Computing

Fall 2007 - Spring 2009

Publications: D.0.28

Experiments for interdomain path splicing; design and implementation of the path splicing prototype. Work received 2nd prize in 2008 Georgia Tech College of Computing undergraduate research competition. Megan was also the winner of the 2009 College of Computing Undergraduate Research Award, and the 2009 Sigma Xi Best Undergraduate Researcher Award. Megan is now a Ph.D. student at Stanford University.

Hongyi Hu M.I.T. EECS

Spring 2005 - Fall 2005

Extensions to the rcc router configuration checker tool for static configuration analysis of internal routing protocol configurations.

C.5. Special Projects

Dan Doozan College of Computing

Fall 2011 - Summer 2012

Research on anti-censorship and filter bubbles.

Mona Chitnis College of Computing

Spring 2010

Research on OpenFlow network architectures.

Sravanthi Gondhi College of Computing

Spring 2010

Research on online traffic engineering.

Shruti Gupta College of Computing

Spring 2010

Research on online traffic engineering.

Utkarsh Shrivastava College of Computing

Spring 2010

Research on network-level behavior of spammers.

Pooja Rajanna College of Computing

Spring 2010

Research on network-level behavior of spammers.

Luxmi Saha College of Computing

Spring 2010

Research on data-center scheduling algorithms.

Dongchan Kim College of Computing

Fall 2009

Research on spam filtering.

Sonali Batra College of Computing

Summer 2009

Research on anti-phishing techniques.

Radhika Partharathy College of Computing
Fall 2008
Research on anti-phishing techniques.

Sagar Mehta College of Computing
Fall 2006 - Spring 2008
Research on anti-phishing techniques.

Bhairav Dutia College of Computing
Fall 2006
Research on anti-censorship techniques and countermeasures.

Megan Benoit College of Computing
Fall 2006
Research on spammers' email address harvesting practices.

Amit Khanna College of Computing
Fall 2006
Implemented Secure BGP (S-BGP) in the Quagga software router. Software publically available and operators are using the codebase for ongoing work on certificates for secure routing.

Daniel Mentz College of Computing
Spring 2006
Research on campus network security troubleshooting.

Buddy Moore College of Computing
Summer 2006
Implemented distributed version of the Infranet anti-censorship software. Publicly available.

II. RESEARCH AND CREATIVE SCHOLARSHIP

A. Theses

- A.0.1 Nick Feamster. *Proactive Techniques for Correct and Predictable Internet Routing*. PhD thesis, Massachusetts Institute of Technology, February 2006. Winner of the MIT George M. Sprowls Honorable Mention for Best MIT Ph.D. Dissertation in Computer Science.
- A.0.2 Nick Feamster. Adaptive delivery of real-time streaming video. Master's thesis, Massachusetts Institute of Technology, May 2001. Winner of the MIT EECS William A. Martin Memorial Thesis Award.

F.4. Software

My research group regularly releases software and makes a practice of releasing source code with most published papers. As a supplement to the descriptions below, my research group’s Github page is available at: <http://github.com/gtnoise/>.

- F.4.1 *Project BISmark: An Application Platform for Home Networks*. Project BISmark (Broadband Internet Service Benchmark) is a platform for developing network management applications for home networks. The BISmark firmware is based on OpenWrt, an open-source operating system for home routers. Currently, BISmark includes a suite of passive and active network measurements that allows a home Internet user to continuously monitor various performance metrics, such as upstream and downstream throughput, latency, and packet loss. As of Spring 2013, BISmark is deployed in nearly 300 homes around the world in more than 20 countries. We are currently working both to expand the deployment and to extend the capabilities of the platform, to allow other researchers to use the platform for their own measurements. See <http://projectbismark.net> for details.
- F.4.2 *MySpeedTest: A Tool for Mobile Performance Measurement*. Building on the success of BISmark, my students Sachit Muckaden, Abhishek Jain, and I have developed a tool to measure performance from mobile cellular handsets. The application collects a variety of data, including latency and throughput measurements to a variety of servers around the world, hosted by Measurement Lab. The application is now deployed on more than 4,000 handsets in over 130 countries. Some of the most significant deployments are in developing countries, and we are currently collaborating with ResearchICTAfrica, a policy organization in Africa, to study the performance of both fixed and mobile broadband across the continent. Software is available at <http://goo.gl/28tx3>.
- F.4.3 *Bobble: Bursting Online Filter Bubbles*. With students Xinyu Xing, Dan Doozan and colleague Wenke Lee, I have designed and developed Bobble, a Chrome extension that allows users to see how their Web searches appear from different vantage points. The filter bubble is a concept developed by Internet activist Eli Pariser in his book to describe a phenomenon in which websites use algorithms to predict what information a user may like to see based on the user’s location, search history, etc. As a result, a website may

only show information which agrees with the user's past viewpoints. A typical example is Google's personalized search results. To "pop" the bubbles created by Google search (also called de-personalization), our research group in the Georgia Tech Information Security Center is conducting ground-breaking research and developing software, Filter Bubble. Filter Bubble is a chrome extension that uses hundreds of nodes to distribute a user's Google search queries world wide each time the user performs a Google search. Using Filter Bubble, a user can easily see differences between his and others' Google search returns. The plugin has been installed by more than 100 users around the world and is available at <http://bobbie.gtisc.gatech.edu/>.

- F.4.4 *Appu: Measuring Online Privacy Footprints.* With so many web applications and sites in the current time, it's hard for a user to keep track of where does her personal information reside. With Appu, we aim to make this job easier for the end user. Appu keeps track of personal information such as passwords, username, birthdate, address, credit card numbers, and social security number so that a user can find out all sites that store a particular bit of personal information. In the current beta release, Appu downloads personal information from sites where you have account and also tries to prevent password reuse across websites by warning users about it. Software is available at <http://appu.gtnoise.net/>
- F.4.5 *Campus-Wide OpenFlow Deployment: Access and Information Flow Control for Enterprise Networks.* Resonance is a system for controlling access and information flow in an enterprise network. Network operators currently use access control systems that are coarse-grained (i.e., it is difficult to apply specialized policy to individual users) and static (i.e., it is difficult to quickly change the extent of a user's access). Towards fixing these problems, we have developed a system that allows network operators to program network policy using a controller that is distinct from the switch itself and can be programmed to implement network-wide policy. We have implemented and deployed this system in an operational network that spans two buildings on the Georgia Tech campus; the network sees regular use, and a deployment in Georgia Tech dormitories or the wireless network is planned for the near future. We first demonstrated the function of this network at the 7th GENI Engineering Conference in March 2010, and recently demonstrated a version on Resonance that facilitates various home network management tasks at the 2011 Open Network Summit. See <http://groups.geni.net/geni/wiki/BGPMux> for details.
- F.4.6 *NANO: Network Access Neutrality Observatory.* The Network Access Neutrality Observatory (NANO) is a system to help users determine whether their traffic is being discriminated against by an access ISP. In contrast to existing systems for detecting network neutrality violations, NANO makes no assumptions about the mechanism for discrimination or the services that the ISP might be discriminated against. NANO has been released in collaboration with Google as part of the Measurement Lab project. A preliminary version of the software was released to a small group of users in March 2009 for testing; a complete release is available for download at: <http://gtnoise.net/nano/>.
- F.4.7 *Implementation of GENI Prototype: Virtual Networks and BGP Session Multiplexer.* In the process of developing software for the NSF-Sponsored GENI Project Office. This project (1) adds facilities and functions to the VINI testbed to enable experiments to carry traffic from real users; and (2) increases the experimental use of the VINI testbed by providing a familiar experiment management facility. The deliverables for this project all comprise software for supporting external connectivity and flexible, facile experimentation on the GENI testbed. The primary deliverables are a BGP session multiplexer—a router based on the Quagga software routing suite, software support for virtual tunnel and node creation, and integration of the above functionality with clearinghouse services developed

as part of the ProtoGENI project.

See <http://groups.geni.net/geni/wiki/BGPMux>.

This project contributes to GENI design and prototyping through BGP mux development integration with ISPs; tunnel and topology establishment and management; ProtoGENI clearinghouse integration; and support for isolation and resource swapout. With researchers at Princeton, we have also built VINI, a large distributed testbed for specifying virtual network topologies and experimenting with routing protocols and architectures in a controlled, realistic emulation environment. See <http://vini-veritas.net/> for details.

- F.4.8 *rcc: router configuration checker*. Static configuration analysis tool for Border Gateway Protocol (BGP) routing configurations. Downloaded by over 100 network operators and many large, nationwide backbone ISPs around the world. See <http://gtnoise.net/rcc/> for details.
- F.4.9 *Infranet*. System for circumventing Web censorship firewalls (e.g., those in China, Saudia Arabia, etc.). Available on Sourceforge. Featured in articles in *Technology Review*, *New Scientist*, and *Slashdot*. See <http://nms.lcs.mit.edu/projects/infranet/>.
- F.4.10 *The Datapostory*. Originally the “MIT BGP Monitor”, the Datapostory is growing to support multiple data feeds (e.g., spam, end-to-end measurement probes, traceroutes, Abilene data, etc.). Currently used by researchers at Georgia Tech, Carnegie Mellon, University of Michigan, Princeton, MIT. See <http://www.datapostory.net/> for details.
- F.4.11 *Secure BGP Implementation*. Implementation of S-BGP in the Quagga software router. Our implementation may be used by Randy Bush and Geoff Huston in their project to develop a certificate infrastructure for secure routing protocols.
- F.4.12 *SR-RTP*. Transport protocol for selective retransmission of packets in an MPEG video stream. Incorporated into “Oxygen TV” for MIT Project Oxygen. Some ideas incorporated into the OpenDivX video transport protocol.

F.5. Conference Posters and Demos

- F.5.1 S. Roy and N. Feamster. Characterizing Correlated Latency Anomalies in Broadband Access Networks. In *Proc. ACM SIGCOMM*, Hong Kong, China, August 2013.
- F.5.2 Hyojoon Kim, Mike Schlansker, Jose Renato Santos, Jean Tourrilhes, Yoshio Turner, and Nick Feamster. Coronet: Fault tolerance for software defined networks. In *Network Protocols (ICNP), 2012 20th IEEE International Conference on*, pages 1–2. IEEE, 2012.
- F.5.3 Srikanth Sundaresan, Nazanin Magharei, Nick Feamster, and Renata Teixeira. Accelerating Last-Mile Web Performance with Popularity-Based Prefetching. In *Proc. ACM SIGCOMM*, Helsinki, Finland, August 2012.
- F.5.4 Hyojoon Kim, Srikanth Sundaresan, Marshini Chetty, Nick Feamster, and W. Keith Edwards. Communicating with Caps: Managing Usage Caps in Home Networks. In *Proc. ACM SIGCOMM*, Toronto, Ontario, Canada, August 2011.
- F.5.5 Maria Konte and Nick Feamster. Wide-Area Routing Dynamics of Malicious Networks. In *Proc. ACM SIGCOMM*, Toronto, Ontario, Canada, August 2011.
- F.5.6 Vytautas Valancius, Hyojoon Kim, and Nick Feamster. Transit Portal: BGP Connectivity as a Service. In *Proc. ACM SIGCOMM*, New Delhi, India, August 2010. Demo.

- F.5.7 Sam Burnett, Nick Feamster, and Santosh Vempala. Circumventing Censorship with Collage. In *Proc. ACM SIGCOMM*, New Delhi, India, August 2010. Demo.

- F.5.17 Murtaza Motiwala, Andy Bavier, and Nick Feamster. In-Band Network Troubleshooting. In *Proc. Fourth Symposium on Networked Systems Design and Implementation (NSDI)*, Cambridge, MA, April 2007.
- F.5.18 Anirudh Ramachandran and Nick Feamster. Understanding the Network-Level Behavior of Spammers. In *Proc. Third Symposium on Networked Systems Design and Implementation (NSDI)*, San Jose, CA, May 2006.
- F.5.19 Nick Feamster and Hari Balakrishnan. Detecting BGP Configuration Faults with Static Analysis. In *Proc. First Symposium on Networked Systems Design and Implementation (NSDI)*, San Francisco, CA, March 2004.

G. Research Proposals and Grants (Principal Investigator)

1. Approved and Funded

G.1.1 Improving the Performance and Security of Home Networks with Programmable Home Routers

Sponsor: N. Feamster (PI)
Investigator(s): \$65,000 for 1 year
Amount: *Awarded: September 2013*

G.1.2 Demand Characterization and Management for Access Networks

Sponsor: Cisco Systems
Investigator(s): N. Feamster (PI) and R. Johari
Amount: *\$99,766 for 1 year*
Awarded: April 2013

G.1.3 Personal Information Fusion with In Situ Sensing Infrastructure

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI)
Amount: *\$75,000 for 1 year.*
Awarded: July 2012

G.1.4 Characterizing and Exposing Bias in Social and Mainstream Media

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI)
Amount: *\$175,000 for 1 year.*
Awarded: July 2012

G.1.5 I-Corps: Helping Users and ISPs Manage Home Networks with BISmark

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI)
Amount: *\$50,000 for 1 year.*
Awarded: June 2012

G.1.6 Optimizing Network Support for Cloud Services: From Short-Term Measurements to Long-Term Planning

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI), J. Rexford
Amount: *\$574,996.00 for 4 years.*
Awarded: April 2012

G.1.7 Facilitating Free and Open Access to Information on the Internet

Sponsor: National Science Foundation
Investigator(s): R. Dingledine, N. Feamster (PI), E. Felten, M. Freedman, H. Klein, W. Lee
Amount: *\$1,500,000 for 4 years*
Awarded: March 2011

G.1.8 Measurement Infrastructure for Home Networks

Sponsor: National Science Foundation
Investigator(s): K. Calvert, W.K. Edwards, N. Feamster (PI), R. Grinter
Amount: *\$1,200,000 for 4 years*
Awarded: February 2011

G.1.9 Monitoring Free and Open Access to Information on the Internet

Sponsor: Google Focus Grant

Investigator(s): N. Feamster and W. Lee
Amount: \$1,500,000 for 3 years
Awarded: February 2011

G.1.10 GENI OpenFlow Campus Buildout

Sponsor: GENI Project Office
Investigator(s): N. Feamster (PI), Russ Clark
Amount: \$64,675 for 1 year
Awarded: October 2010

G.1.11 Architecting for Innovation

Sponsor: National Science Foundation
Investigator(s): H. Balakrishnan, N. Feamster, B. Godfrey, N. McKeown, J. Rexford, S. Shenker (PI)
Amount: \$200,000 for 1 year
Awarded: September 2010

G.1.12 Aster*x: Load-Balancing Web Traffic over Wide-Area Networks

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI), Russ Clark
Amount: \$75,000 for 1 year
Awarded: August 2010

G.1.13 Network-Wide Configuration Testing and Synthesis

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI), A. Akella
Amount: \$500,000 for 3 years
Awarded: June 2010

G.1.14 MEDITA - Multi-layer Enterprise-wide Dynamic Information-flow Tracking & Assurance

Sponsor: National Science Foundation
Investigator(s): N. Feamster, A. Orso (PI), M. Prvulovic
Amount: \$900,000 for 3 years
Awarded: March 2010

G.1.15 Campus Network Access and Admission Control with Openflow

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI), R. Clark
Amount: \$300,000 for 3 years
Awarded: January 2010

G.1.16 Studying DNS Traffic Patterns

Sponsor: Verisign
Investigator(s): N. Feamster
Amount: \$30,000 for 1 year
Awarded: November 2009

G.1.17 CIFellowship for Cristian Lumezanu

Sponsor: National Science Foundation
Investigator(s): C. Lumezanu, N. Feamster (PI)
Amount: \$140,000 for 1 year
Awarded: November 2009

G.1.18 Military Network Protocol

Sponsor: DARPA Subcontract
Investigator(s): N. Feamster

Amount: \$37,000 for 1 year
Awarded: November 2009

G.1.19 Botnet Attribution and Removal: From Axioms to Theories to Practice

Sponsor: Office of Naval Research

Investigator(s): W. Lee (PI), D. Dagon, J. Giffin, N. Feamster, K. Shin, F. Jahanian, M. Bailey, J. Mitchell, G. Vigna, C. Kruegel

Amount: \$7,500,000 for 5 years

Awarded: August 2009

G.1.20 Taint-based Information Tracking in Networked Systems

Sponsor: National Science Foundation Trusted Computing Program

Investigator(s): N. Feamster

Amount: \$450,000 for 3 years

Awarded: August 2009

G.1.21 Towards a Market for Internet Connectivity

Sponsor: Office of Naval Research

Investigator(s): N. Feamster (PI), R. Johari, V. Vazirani

Amount: \$350,000 for 1 year

Awarded: March 2009

G.1.22 Bringing Experimenters and External Connectivity to GENI

Sponsor: GENI Project Office

Investigator(s): N. Feamster

Amount: \$320,000 for 3 years

Awarded: September 2008

G.1.23 Routing Without Recomputation

Sponsor: Cisco Systems

Investigator(s): N. Feamster

Amount: \$96,019 for 1 year

Awarded: September 2008

G.1.24 CLEANSE: Cross-Layer Large-Scale Efficient Analysis of Network Activities to Secure the Internet

Sponsor: National Science Foundation Cybertrust Program

Investigator(s): W. Lee (PI), N. Feamster and others

Amount: \$1,200,000 for 5 years

Awarded: September 2008

G.1.25 Virtual Center for Network and Security Data

Sponsor: Department of Homeland Security

Investigator(s): N. Feamster

Amount: \$48,000 for 2 years

Awarded: March 2008

G.1.26 Sloan Research Fellowship

Sponsor: Alfred P. Sloan Foundation

Investigator(s): N. Feamster

Amount: \$45,000 for 2 years

Awarded: February 2008

G.1.27 Enabling Security and Network Management Research for Future Networks

Sponsor: National Science Foundation CRI-IAD Program

- Investigator(s): N. Feamster (PI), Z. Mao, W. Lee
Amount: \$397,426 for 3 years
Awarded: February 2008
- G.1.28 **SMITE: Scalable Monitoring in the Extreme**
Sponsor: DARPA BAA 07-52: Scalable Network Monitoring
Investigator(s): N. Feamster (PI), W. Lee
Amount: \$250,000 for 2 years
Awarded: January 2008
- G.1.29 **Countering Botnets: Anomaly-Based Detection, Comprehensive Analysis, and Efficient Mitigation**
Sponsor: Department of Homeland Security BAA07-09
Investigator(s): W. Lee (PI), N. Feamster, J. Giffin
Amount: \$1,050,730 for 2 years
Awarded: January 2008
- G.1.30 **Spam Filtering Research**
Sponsor: IBM Faculty Award
Investigator(s): N. Feamster
Amount: \$ 7,500 (unrestricted gift)
Awarded: June 2007
- G.1.31 **SCAN: Statistical Collaborative Analysis of Networks**
Sponsor: National Science Foundation NeTS-NBD Program
Investigator(s): N. Feamster (PI), A. Gray, J. Hellerstein, C. Guestrin
Amount: \$ 95,000 for 3 years.
Awarded: June 2007
- G.1.32 **Towards an Accountable Internet Architecture**
Sponsor: National Science Foundation CyberTrust Program (Team Proposal)
Investigator(s): D. Andersen, H. Balakrishnan, N. Feamster (PI), S. Shenker
Amount: \$ 300,000 for 3 years.
Awarded: May 2007
- G.1.33 **Fish4Phish: Fishing for Phishing in a Large Pond**
Sponsor: AT&T Labs—Research
Investigator(s): N. Feamster (PI), O. Spatscheck, K. van der Merwe
Amount: Funding for summer intern.
Awarded: February 2007
- G.1.34 **Improving Network Operations with a View from the Edge.**
Sponsor: National Science Foundation CAREER Program
Investigator(s): N. Feamster (PI)
Amount: \$400,000 for 5 years.
Awarded: January 2007
- G.1.35 **Equipment Donation for Network Operations Research**
Sponsor: Intel Corporation
Investigator(s): N. Feamster
Amount: \$30,000
Awarded: October 2006
- G.1.36 **CABO: Concurrent Architectures are Better than One**
Sponsor: National Science Foundation NeTS-FIND Program

Investigator(s): N. Feamster (PI), L. Gao, J. Rexford
Amount: \$ 300,000 for 4 years
Awarded: June 2006

G.1.37 Verification and Modeling of Wide-Area Internet Routing

Sponsor: Cisco Systems University Research Program
Investigator(s): N. Feamster and H. Balakrishnan (PI)
Amount: \$ 95,500 for 1 year.
Awarded: June 2004

2. Pending

G.2.1 MRI: Development of an Open Observatory for the Internet's Last Mile

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI), W. Lee, S. Banerjee, D. Levin, N. Spring, R. Clark
Amount: \$4,000,000 for 5 years
Submitted: February 2013

G.2.2 TWC SBE: Frontier: Collaborative: EPICS: Empowering People to Overcome Internet Controls

Sponsor: National Science Foundation
Investigator(s): W. Lee (PI), N. Feamster, H. Klein, M. Bailey, A. Snoeren, A. Lupia, N. Valentino, A. Halderman, G. Vigna, C. Kreugel
Amount: \$5,500,000 for 5 years
Submitted: January 2013

G.2.3 NeTS: Small: Collaborative Research: Studying and Improving the Performance of Access Networks

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI), D. Levin
Amount: \$250,000 for 3 years
Submitted: December 2012

G.2.4 TWC: Medium: Collaborative: Exploiting Structure for Proactive Protection against Web-based Malware

Sponsor: National Science Foundation
Investigator(s): N. Feamster (PI), V. Sekar
Amount: \$240,000 for 3 years
Submitted: November 2012

3. Not Funded

Available upon request.

H. Research Proposals and Grants (Contributor)

1. Approved and Funded

H.1.1 Development of a shared network measurement storage and analysis infrastructure

Sponsor: National Science Foundation Major Research Infrastructure (MRI)
Investigator(s): D. Andersen, D. Song, C. Wang, H. Zhang
Amount: \$ 101,488.96
User and developer for proposed infrastructure; possible equipment money to Georgia Tech .
Submitted: February 2006.

2. Pending

3. Not Funded

Available upon request.

I. Other

I.0.1 In-Band, Bottom-Up Support for Network Accountability

Sponsor: N. Feamster, W. Lee, M. Ahamad

Investigator(s): DARPA Strategic Technology Office

Amount: *White paper / Request for Information.*

Submitted: February 2007

I.0.2 Towards an Accountable Internet Architecture

Sponsor: D. Andersen, H. Balakrishnan, N. Feamster, S. Shenker

Investigator(s): DARPA Strategic Technology Office

Amount: *White paper / Request for Information.*

Submitted: February 2007

J. Research Honors and Awards

2013	ACM SIGCOMM Community Award Paper , <i>ACM SIGCOMM Internet Measurement Conference</i>
2012	Hesburgh Teaching Fellow
2012	PRSA Bronze Anvil Award for <i>Wall Street Journal</i> Editorial Article
2011	Selected Participant for U.S. National Academy of Engineering Frontiers of Engineering Symposium
2010	John P. Imlay Distinguished Lecture, Georgia Tech
2010	Panelist for NSF/ <i>Discover Magazine</i> Special Issue on "The New Internet"
2010	Technology Review Top Innovators Under 35
2010	Georgia Tech Sigma Xi Young Faculty Award
2010	Selected Participant for U.S. National Academy of Science Kavli Frontiers of Science Symposium
2009	Best Paper, <i>Passive and Active Measurement Conference</i>
2009	Georgia Tech Sigma Xi Best Undergraduate Research Advisor
2008	NSF Presidential Early Career Award for Scientists and Engineers (PECASE)
2008	Alfred P. Sloan Fellowship
2008	Georgia Tech College of Computing Outstanding Junior Faculty Research Award
2007	IBM Faculty Award
2007	NSF CAREER Award
2006	Best Student Paper (Advisor), <i>ACM SIGCOMM</i> (Premier Networking Conference)
2006	George M. Sprowls honorable mention for best Ph.D. thesis in computer science, MIT
2005	Best Paper, <i>2nd USENIX Symposium on Networked Systems Design and Implementation</i>
2002	Best Student Paper, <i>11th USENIX Security Symposium</i>

2001	Best Student Paper, <i>10th USENIX Security Symposium</i>
2002–2005	NSF Graduate Research Fellow
2001	MIT William A. Martin Memorial Thesis Award for Best EECS Master’s Thesis

III. SERVICE

A. Professional Activities

A.1. Memberships and Activities in Professional Societies

Member, ACM Special Interest Group on Data Communications (SIGCOMM)

Member, Association for Computing Machinery (ACM)

Member, USENIX Technical Association

A.2. Conference Committee Activities

Most significant activities are in **boldface**.

2014	Program Committee, <i>Research Conference on Communication, Information and Internet Policy (TPRC)</i>
2014	Program Committee, <i>ISOC Network and Distributed Security Symposium (NDSS)</i>
2013	Program Committee Co-Chair , <i>USENIX Symposium on Networked Systems Design and Implementation (NSDI)</i>
2013	Program Committee, <i>ACM SIGCOMM</i>
2013	Program Committee, <i>ACM SIGCOMM Internet Measurement Conference</i>
2013	Poster and Demo Committee Co-Chair , <i>ACM SIGCOMM</i>
2013	Program Committee, <i>USENIX Workshop on Free and Open Communications on the Internet</i>
2013	Co-organizer , <i>Boston Freedom in Online Communications (BFOC) Day</i>
2013	Program Committee, <i>IEEE Symposium on Security and Privacy</i>
2013	Editor , <i>IEEE Journal on Network and Systems Management</i>
2012	Program Committee Co-Chair , <i>ACM SIGCOMM Workshop on Hot Topics in Software Defined Networking (HotSDN)</i>
2012	Program Committee, <i>USENIX Workshop on Hot Topics in Security (HotSec)</i>
2012	Program Committee, <i>First Workshop on Systems and Infrastructure for the Digital Home (HomeSys)</i>
2012	Program Committee, <i>ACM SIGCOMM Workshop on Medical Communication (MedCOMM)</i>
2012	Program Committee, <i>ACM SIGCOMM Workshop on Hot Topics in Networking (HotNets)</i>
2012	Program Committee, <i>ACM SIGCOMM Internet Measurement Conference</i>
2012	Program Committee, <i>USENIX Workshop on Free and Open Communication on the Internet (FOCI)</i>
2012	Program Committee, <i>ACM SIGCOMM</i>
2012	Program Committee, <i>IEEE Symposium on Security and Privacy</i>
2012	Program Committee, <i>ACM/USENIX Symposium on Networked Systems Design and Implementation (NSDI)</i>
2012	Program Committee, <i>ACM SIGCOMM COMSNETS</i>
2011	Founder and Chair , <i>USENIX Workshop on Free and Open Communication on the Internet</i>

2011 **Panel Organizer**, *IEEE Computer and Communications Workshop (CCW)*

2011 Program Committee, *ISOC Network and Distributed Security Symposium*

2011 Program Committee, *ACM Conference on Computer and Communication Security*

2011 Program Committee, *IEEE Symposium on Security and Privacy*

2011 Program Committee, *ACM SIGCOMM Workshop on Home Networks (HomeNets)*

2011 Program Committee, *USENIX Workshop on Hot Topics in Management of Internet, Cloud, and Enterprise Networks and Services (HotICE)*

2011 Program Committee *4th USENIX Workshop on Large-Scale Exploits and Emergent Threats (LEET '11)*

2010 Program Committee, *ACM SIGCOMM Poster and Demo Session*

2010 Program Committee, *ACM SIGCOMM Workshop on Virtualized Infrastructure Systems and Architectures (VISA)*

2010 **Program Committee Co-Chair**, *USENIX Workshop on Internet Network Management (INM/WREN)*

2010 Program Committee, *ACM SIGMETRICS*

2010 Program Committee, *IEEE Symposium on Internet Security and Privacy*

2010 Program Committee, *USENIX Symposium on Networked Systems Design and Implementation (NSDI)*

2010 Program Committee *3rd USENIX Workshop on Large-Scale Exploits and Emergent Threats (LEET '10)*

2009 Program Committee, *ACM SIGCOMM Workshop on Research on Enterprise Networks (WREN)*

2009 Program Committee, *ACM SIGCOMM Workshop on Programmable Routers for Extensible Services of Tomorrow (PRESTO)*

2009 Program Committee, *USENIX Technical Conference*

2009 Program Committee, *ACM SIGCOMM Workshop on Economics of Networked Systems (NetE-con)*

2009 Program Committee *2nd USENIX Workshop on Large-Scale Exploits and Emergent Threats (LEET '09)*

2009 **Poster/Demo Co-Chair**, *ACM SIGCOMM*

2009 Program Committee, *ACM SIGMETRICS*

2009 Program Committee, *6th ACM/USENIX Symposium on Networked Systems Design and Implementation (NSDI)*

2008 Program Committee, *3rd International Workshop on Real Overlays & Distributed Systems*

2008 Program Committee, *ACM SIGCOMM Internet Measurement Conference*

2008 Program Committee, *ACM Conference on Computer and Communications Security (CCS)*

2008 Program Committee, *ACM SIGCOMM*

2008 Program Committee, *ACM SIGMETRICS*

2008 Program Committee, *ACM SIGCOMM Workshop on Programmable Routers for Extensible Services of Tomorrow (PRESTO)*

2008	Program Committee, <i>ACM SIGCOMM Workshop on Economics of Networked Systems (NetE-con)</i>
2008	Program Committee, <i>17th International World Wide Web Conference (Security/Privacy Track)</i>
2008	Program Committee, <i>ACM SIGMETRICS Workshop on Internet Network Management</i>
2008	Program Committee, <i>16th IEEE LAN/MAN Workshop</i>
2007	Program Committee, <i>3rd Annual CoNext Conference</i>
2007	Program Committee, <i>ACM SIGCOMM Workshop on Internet Management (INM)</i>
2007	Program Committee, <i>ACM SIGCOMM Student Poster Session</i>
2007	Program Committee, <i>ACM SIGMETRICS Workshop on Mining Internet Data (MineNet)</i>
2007	Co-Organizer , DIMACS Workshop Series on Internet Security
2007	Program Committee, <i>4th Conference on Email and Anti-Spam (CEAS)</i>
2007	Program Committee, <i>3rd USENIX Workshop on Steps to Reduce Unwanted Traffic on the Internet (SRUTI)</i>
2007	Program Committee, <i>USENIX Technical Conference</i>
2007	Program Committee, <i>CoNext</i>
2007	Program Committee, <i>16th International World Wide Web Conference (Security/Privacy Track)</i>
2007	Program Committee Co-Chair, <i>ACM/USENIX Workshop on Networks meet Databases (NetDB)</i>
2006–	Program Committee, <i>North American Network Operators Group (NANOG)</i>
2006	Organizer, <i>Workshop on Internet Routing Evolution and Design</i>
2006	Program Committee, <i>ACM SIGCOMM Internet Measurement Conference</i>
2006	Program Committee Co-Chair , <i>Workshop on the Economics of Networked Systems (NetE-con)</i>
2006	Program Committee Co-Chair , <i>CoNext Student Workshop</i>
2006	Program Committee, <i>2nd Annual CoNext Conference</i>
2006	Program Committee, <i>ACM SIGCOMM Workshop on Internet Network Management</i>
2006	Program Committee, <i>IEEE Symposium on Security and Privacy</i>
2006	Program Committee, <i>IEEE Infocom Student Poster Session</i>
2006	Program Committee, <i>IEEE International Conference on Internet Surveillance and Protection</i>

External reviewer for *IEEE/ACM Transactions on Networking*, *SIGCOMM* (2002, 2003, 2004, 2006, 2007), *SOSP* (2001, 2003), *Infocom* (2004, 2006), *HotNets* (2003), *HotOS* (2001), *USENIX Security Symposium* (2002), *ACM Computer Communication Review*, *IEEE Network Magazine*, *IEEE Journal on Selected Areas in Communications*, *Image Communication (EURASIP)*, *ASPLOS* (2004), *MobiSys* (2004), *USENIX* (2005, 2006), *NSDI* (2005, 2006), *IPTPS* (2005), *Workshop on Privacy Enhancing Technologies* (2006).

A.3. Workshops and External Courses

Unless otherwise noted, all listed activities are invited speaking invitations for workshops, tutorials, and symposia.

July 2013	African Network Operators Group Tutorial, Lusaka, Zambia
June 2013	Coursera Online Software Defined Networking Course. 50,000 enrolled students.
March 2013	Co-organizer , <i>Boston Freedom in Online Communications (BFOC) Day</i>
August 2012	Founder and Co-Chair , <i>ACM SIGCOMM Workshop on Hot Topics in Software Defined Networking (HotSDN)</i> , San Francisco, CA
February 2011	Founder and Co-Chair , <i>USENIX Workshop on Free and Open Communications on the Internet (FOCI)</i> , San Francisco, CA
July 2011	African Network Operators Group Tutorial, Dar es Salaam, Tanzania
February 2011	Founder and Organizer , Workshop on Free and Open Communications on the Internet, Atlanta, GA
July 2010	Routing for Cloud Services Tutorial, GENI Engineering Conference 8, San Diego, CA
July 2010	Routing for Cloud Services Tutorial, GENI Engineering Workshop, Princeton, NJ
June 2010	African Network Operators Group Tutorial, Kigali, Rwanda
March 2010	Co-Organizer , DIMACS Workshop on Secure Internet Routing, New Brunswick, NJ
June 2009	Organizer , NSF Security Driven Architectures Workshop, Arlington, VA
March 2009	Workshop on Re-Architecting the Internet (NetArch), Monte Verita, Switzerland
February 2009	CAIDA Active Internet Measurement Systems (AIMS) Workshop, San Diego, CA
October 2008	Panelist at IEEE CCW, Steamboat Springs, Colorado
October 2008	Panelist at ACM SIGCOMM Internet Measurement Conference, Athens, Greece
June 2008	Google Workshop on Internet Measurement, Mountain View, CA
May 2008	Tutorial at 26th Brazilian Symposium on Computer Networks and Distributed Systems, Rio de Janeiro, Brazil
March 2008	Co-Organizer for DIMACS Workshop on Secure Internet Routing
November 2007	NSF/DARPA/ARO NCDI Workshop, College Park, MD
August 2007	DIMACS Tutorial on Algorithms for Next Generation Networks, New Brunswick, NJ
July 2007	INTIMATE Workshop on Methods and Tools for Network Analysis, Paris, France
May 2007	Workshop on Programmable Routers for Extensible Services of Tomorrow (PRESTO), Princeton, NJ
April 2007	NeXtworking, the Second COST-NSF Workshop on Future Internet, Berlin, Germany
February 2007	GIG Routing and Addressing Workshop, Washington, DC
February 2007	DARPA Workshop on Assurable Global Networking, Washington, DC
December 2006	Next-Generation Internet Workshop, Lisbon, Portugal
September 2006	Clean Slate Network Research Symposium, Cambridge, UK
October 2006	Co-organizer , Workshop on Internet Routing Evolution and Design (WIRED), Atlanta, GA
August 2006	Cisco Routing Research Symposium, San Jose, CA
June 2006	ARO-DARPA-DHS Special Workshop on Botnets, Arlington, VA

June 2006	Microsoft Research EdgeNet Workshop, Snoqualmie, WA
June 2006	Microsoft Research “Networking on the Edge” Workshop on Network Management, Seattle, WA
February 2006	NSF Workshop on Theory of Networked Computation, Princeton, NJ
January 2006	Cisco Network Management Summit, San Jose, CA

B. On-Campus Georgia Tech Committees

Spring 2013	Co-Chair, CS Ph.D. Visit Weekend Committee
Fall 2012–Spring 2013	Massive Open Online Masters (MOOMS) Committee
Fall 2011	School of Computer Science Curriculum Committee
Fall 2011	Research, Promotion, and Tenure Committee for Research Scientists
Spring 2010	Faculty Recruiting Committee
Fall 2009	Strategic Planning Committee
Spring 2009–10	Dean Search Committee
Spring 2009	Faculty Recruiting Committee
Spring 2008	Faculty Recruiting Committee
Fall 2006–	Area Coordinator, Networking Area Group
Fall 2006	Co-Organizer, Networking and Telecommunications Group Open House
Spring 2006–	College of Computing Strategic Planning Committee
Spring 2006	Ph.D. Recruiting Weekend Organizing Committee, CSS Division Leader

C. Member of Ph.D. Examining Committees

Ph.D. Thesis Committee

1. Lucas Di Cioccio, Department of Computer Science, University of Paris 6., Fall 2012.
Principal Advisor: Professor Renata Teixeira.
2. Philippa Gil, Department of Computer Science, University of Toronto., Fall 2012.
Principal Advisor: Professor Yashar Ganjali.
3. Nan Hua, College of Computing, Georgia Tech., Spring 2012.
Principal Advisor: Professor Jun Xu.
4. Mehmet Demirci, College of Computing, Georgia Tech., Spring 2012.
Principal Advisor: Professor Mostafa Ammar.
5. Manos Antonakakis, College of Computing, Georgia Tech., Spring 2012.
Principal Advisor: Professor Wenke Lee.
6. Walter de Donato, Department of Computer Science, University of Napoli Federico II., Fall 2011.
Principal Advisor: Professor Antonio Pescape.
7. Tongqing Qiu, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Jim Xu.

8. David Levin, Department of Computer Science, University of Maryland., Fall 2010.
Principal Advisor: Professor Bobby Bhattacharjee.
9. David Dagon, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Wenke Lee.
10. Junjie Zhang, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Wenke Lee.
11. Amogh Dhamdhere, College of Computing, Georgia Tech, Spring 2009.
Principal Advisor: Professor Constantine Dovrolis.
12. Guofei Gu, College of Computing, Georgia Tech, Spring 2008.
Principal Advisor: Professor Wenke Lee.
13. Steve Webb, College of Computing, Georgia Tech, Spring 2008.
Principal Advisor: Professor Calton Pu.
14. Vibhore Kumar, College of Computing, Georgia Tech, Spring 2008.
Principal Advisor: Professor Karsten Schwan.
15. Prahlad Fogla, College of Computing, Georgia Tech, Spring 2007.
Principal Advisor: Professor Wenke Lee.
16. Srinivasan Seetharaman, College of Computing, Georgia Tech, Spring 2007.
Principal Advisor: Professor Mostafa Ammar.
17. Sridhar Srinivasan, College of Computing, Georgia Tech., Spring 2006.
Principal Advisor: Professor Ellen Zegura.
18. Xenofontas Dimitropoulos, Electrical and Computer Engineering, Georgia Tech, Spring 2006.
Principal Advisor: Professor George Riley.
19. Qi Zhao, College of Computing, Georgia Tech, Spring 2006.
Principal Advisor: Professor Jim Xu.
20. Ruomei Gao, College of Computing, Georgia Tech., Fall 2005.
Principal Advisor: Professors Ellen Zegura and Constantine Dovrolis.

Other — Question writer for Ph.D. Qualifying Exam

1. Saamer Akhshabi, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Constantine Dovrolis.
2. Bilal Anwer, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Nick Feamster.
3. Saeideh Bakhshi, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Constantine Dovrolis.
4. Hyojoon Kim, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Nick Feamster.
5. Samantha Lo, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Mostafa Ammar.
6. Aemen Lodhi, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Constantine Dovrolis.

7. Yogesh Mundada, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Nick Feamster.
8. Shruti Sanadhya, College of Computing, Georgia Tech., Spring 2011.
Principal Advisor: Professor Raghupathy Sivakumar.
9. Sam Burnett, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Nick Feamster.
10. Shuang Hao, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Nick Feamster.
11. Partha Kanuparth, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Constantine Dovrolis.
12. Maria Konte, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Nick Feamster.
13. Robert Lychev, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Nick Feamster.
14. Yogesh Mundada, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Nick Feamster.
15. Cong Shi, College of Computing, Georgia Tech., Spring 2010.
Principal Advisor: Professor Mostafa Ammar.
16. Yiyi Huang, College of Computing, Georgia Tech., Spring 2008.
Principal Advisor: Professor Nick Feamster.
17. Anirudh Ramachandran, College of Computing, Georgia Tech., Spring 2008.
Principal Advisor: Professor Nick Feamster.
18. Murtaza Motiwala, College of Computing, Georgia Tech., Spring 2009.
Principal Advisor: Professor Nick Feamster.
19. Vytautas Valancius, College of Computing, Georgia Tech., Spring 2009.
Principal Advisor: Professor Nick Feamster.
20. Mehmet Demirci, College of Computing, Georgia Tech., Spring 2009.
Principal Advisor: Professor Mostafa Ammar.
21. Ahmed Mansy, College of Computing, Georgia Tech., Spring 2009.
Principal Advisor: Professor Mostafa Ammar.
22. Tonqing Qiu, College of Computing, Georgia Tech., Spring 2009.
Principal Advisor: Professor Jim Xu.
23. Nan Hua, College of Computing, Georgia Tech., Spring 2009.
Principal Advisor: Professor Jim Xu.
24. Chuck Zhao, College of Computing, Georgia Tech., Spring 2009.
Principal Advisor: Professor Jim Xu.
25. Mukarram Bin Tariq, College of Computing, Georgia Tech., Spring 2007.
Principal Advisor: Professor Nick Feamster.
26. Zhenshun Zhang, College of Computing, Georgia Tech., Spring 2007.
Principal Advisor: Professor Raghupathy Sivakumar.
27. Yang Chen, College of Computing, Georgia Tech., Spring 2006.
Principal Advisor: Professor Jim Xu.

D. Consulting, Advisory, and Other External Appointments

1. Technical Advisory Board, Guavus, Inc. <http://www.guavus.com/>
2. Technical Advisory Board, Anchor Intelligence, Inc. <http://www.fraudwall.net/>
3. Consultant, Damballa, Inc. <http://www.anchorintelligence.com/>

E. Research Project Reviewer

1. National Science Foundation.
April 2013
2. National Science Foundation.
May 2012
3. National Science Foundation.
May 2011
4. National Science Foundation.
May 2009
5. National Science Foundation.
July 2008
6. National Science Foundation.
June 2008
7. National Science Foundation.
October 2007
8. National Science Foundation.
March 2007
9. National Science Foundation.
February 2007
10. Department of Homeland Security.
Fall 2006 - Present
Department of Homeland Security PREDICT Review Board

IV. NATIONAL AND INTERNATIONAL RECOGNITION

A. Invited Conference Session Chair

- | | |
|--------------|---|
| October 2013 | Session chair and panel moderator, <i>Research Conference on Communication, Information and Internet Policy (TPRC)</i> |
| August 2012 | Panel organizer, <i>ACM SIGCOMM Workshop on Hot Topics in Software Defined Networking (HotSDN)</i> , Helsinki, Finland |
| August 2012 | Session chair, <i>ACM SIGCOMM Workshop on Measurements Up the Stack (W-MUST)</i> , Helsinki, Finland |
| October 2011 | Session organizer and chair, <i>IEEE Computer and Communications Workshop (CCW)</i> , Hyannis, MA |
| April 2010 | Session chair, <i>ACM/USENIX Networked Systems Design and Implementation (NSDI)</i> , San Jose, CA |
| October 2008 | Session chair, <i>ACM SIGCOMM HotNets-VII Workshop</i> , Calgary, Alberta, Canada |
| October 2008 | Session chair, <i>ACM SIGCOMM Internet Measurement Conference</i> , Athens, Greece |
| March 2008 | Session organizer, <i>Security for the Future Internet, NSF Cybertrust PI Meeting</i> , Arlington, VA |
| June 2007 | Session chair, <i>Network Virtualization, NSF NeTS-FIND PI Meeting</i> , Arlington, VA |
| June 2006 | Session chair, <i>Mechanism Design and Networking, First Workshop on the Economics of Networked Systems (NetEcon06)</i> , Ann Arbor, MI |

B. Patents

- | | |
|------------|--|
| March 2007 | "Method and System for Detecting and Responding to Attacking Networks", U.S. Patent Application # 11/538,212 |
|------------|--|

C. Editorial and Reviewer Work for Technical Journals and Publishers

- External reviewer for *IEEE/ACM Transactions on Networking*
- External reviewer for *IEEE Journal on Selected Areas in Communications*
- External reviewer for *IEEE Computer Networks*
- External reviewer for *ACM Transactions on Information and Systems Security*

V. OTHER CONTRIBUTIONS

A. Seminar Presentations

- | | |
|-------|--|
| A.0.1 | Censorship resilience: Current Research Challenges and Future Directions. In <i>ETH Zurich Information Security and Privacy Center. Workshop on Securing Future Communication Networks Against Emerging Threats</i> , Zurich, Switzerland, October 2013. |
| A.0.2 | Software Defined Networking. In <i>Juniper SDN Summit</i> , Atlanta, GA, October 2013. |
| A.0.3 | Software Defined Networking. In <i>Cisco Software Defined Infrastructure (SDI) Summit</i> , Santa Clara, CA, August 2013. |

- A.0.4 A ReMOOCable Experience: Teaching Networking to the Masses. In *University of Cape Town Department Colloquium*, Cape Town, South Africa, July 2013.
- A.0.5 Measuring Broadband Performance in South Africa. In *African Network Operators Group*, Lusaka, Zambia, June 2013.
- A.0.6 The Battle for Control of Online Communications. In *Georgetown Computer Science Colloquium*, Washington, DC, April 2013.
- A.0.7 SDX: A Software Defined Internet Exchange. In *Open Network Summit*, Santa Clara, CA, April 2013.
- A.0.8 Broadband Internet Performance: A View from the Gateway. In *National Academy of Engineering Cybersecurity Symposium*, Atlanta, GA, March 2013.
- A.0.9 SDX: A Software Defined Internet Exchange. In *IRTF Software Defined Networking Research Group*, Orlando, Florida, March 2013.
- A.0.10 The Battle for Control of Online Communications. In *UC Berkeley TRUST Seminar*, Berkeley, CA, March 2013.
- A.0.11 Exposing Inconsistent Web Search Results with Bobble. In *CAIDA Active Internet Measurement Systems (AIMS) Workshop*, San Diego, CA, February 2013.
- A.0.12 The Battle for Control of Online Communications. In *AT&T Research Colloquium*, New York, NY, November 2012.
- A.0.13 The Battle for Control of Online Communications. In *George Washington University Computer Science Colloquium*, Washington, DC, November 2012.
- A.0.14 Software Defined Networking. In *IETF Plenary Session*, Vancouver, British Columbia, Canada, August 2012.
- A.0.15 Lithium: Event-Driven Network Control. In *IRTF Software Defined Networking Research Group*, Vancouver, British Columbia, Canada, August 2012.
- A.0.16 Lithium: Event-Driven Network Control. In *GENI CIO Workshop*, Boston, MA, July 2012.
- A.0.17 Lithium: Event-Driven Network Control. In *2nd Open Networking Summit*, Santa Clara, CA, March 2012.
- A.0.18 Broadband Internet Performance: A View from the Gateway. In *IEEE 802.15 Working Group*, Atlanta, GA, June 2012.
- A.0.19 The Battle for Control of Online Communications. In *Microsoft Research Colloquium*, Seattle, WA, April 2012.
- A.0.20 The Battle for Control of Online Communications. In *University of Wisconsin Computer Science Department Colloquium*, Madison, WI, April 2012.
- A.0.21 The Battle for Control of Online Communications. In *Google Tech Talk*, Seattle, WA, April 2012.
- A.0.22 The Battle for Control of Online Communications. In *University of Washington Computer Science Department Colloquium*, Seattle, WA, April 2012.
- A.0.23 The Battle for Control of Online Communications. In *University of Maryland Computer Science Department Colloquium*, College Park, MD, April 2012.

- A.0.24 The Battle for Control of Online Communications. In *New York University Computer Science Department Colloquium*, New York, NY, March 2012.
- A.0.25 The Battle for Control of Online Communications. In *Columbia University Computer Science Department Colloquium*, New York, NY, February 2012.
- A.0.26 The Battle for Control of Online Communications. In *Boston University Electrical Engineering Department Colloquium*, Boston, MA, February 2012.
- A.0.27 The Battle for Control of Online Communications. In *Brown University Computer Science Department Colloquium*, Providence, RI, February 2012.
- A.0.28 The Battle for Control of Online Communications. In *University of Michigan Computer Science Department Colloquium*, Ann Arbor, MI, February 2012.
- A.0.29 The Battle for Control of Online Communications. In *University of Illinois Computer Science Department Colloquium*, Urbana-Champaign, IL, February 2012.
- A.0.30 How Can We Make Home Networks Easier to Manage? In *Homework Summit*, Cambridge, UK, January 2012.
- A.0.31 The Battle for Control of Online Communications. In *Max Planck Institute for Software Systems Department Colloquium*, Saarbrücken, Germany, November 2011.
- A.0.32 Software Defined Network Management. In *12th GENI Engineering Conference (GEC)*, Kansas City, MO, November 2011.
- A.0.33 Managing the Home Network. In *Broadband 2020 Symposium*, Atlanta, GA, October 2011.
- A.0.34 Software Defined Network Management. In *1st Open Network Summit*, Stanford, CA, October 2011.
- A.0.35 Why IP Alerts May Require New Technology. In *George Mason University Law School IEP Panel*, Arlington, VA, October 2011.
- A.0.36 Open Information Access: Old Problems, Emerging Challenges. In *IEEE Computer Communications Workshop (CCW)*, Hyannis, MA, October 2011.
- A.0.37 Getting Students' Hands Dirty with Clean-Slate Networking. In *ACM SIGCOMM Network Education Workshop (NetEd)*, Toronto, Ontario, Canada, August 2011.
- A.0.38 Reputation Systems Based on Network-Level Behavior. In *Colloquium at Verisign, Inc.*, Reston, VA, July 2011.
- A.0.39 Broadband Internet Performance: A View from the Gateway. In *African Network Operators Group Meeting*, Dar es Salaam, Tanzania, June 2011.
- A.0.40 Broadband Internet Performance: A View from the Gateway. In *Google Tech Talk*, New York, NY, May 2011.
- A.0.41 Adding Traffic Control to Your GENI Slice with BGP Mux. In *10th GENI Engineering Conference (GEC)*, San Juan, Puerto Rico, March 2011.
- A.0.42 Passive and Active Measurements at the Network Frontier (The home). In *12th Passive and Active Measurement Conference (PAM)*, Atlanta, GA, March 2011.
- A.0.43 Broadband Internet Performance: A View from the Gateway. In *Internet2 Members' Meeting*, Clemson, SC, February 2011.

- A.0.44 Broadband Internet Performance: A View from the Gateway. In *UCSD/CAIDA Active Internet Measurement Symposium (AIMS)*, San Diego, CA, February 2011.
- A.0.45 Challenges and Opportunities for Tomorrow's Networks. In *Princeton University Department of Computer Science Colloquium*, Princeton, NJ, February 2011.
- A.0.46 SwitchBlade: A Platform for Rapid Deployment of Network Protocols on Programmable Hardware. In *Bell Labs Symposium*, Murray Hill, NJ, February 2011.
- A.0.47 Challenges and Opportunities for Tomorrow's Networks. In *ACM SIGCOMM CoNext Keynote Address*, Philadelphia, PA, November 2010.
- A.0.48 What Factors Affect Home Network Performance. In *Cisco/Intel Home Network Services Summit*, San Jose, CA, November 2010.
- A.0.49 Challenges and Opportunities for Tomorrow's Networks. In *John P. Imlay Distinguished Lecture*, Atlanta, GA, October 2010.
- A.0.50 SwitchBlade: A Platform for Rapid Deployment of Network Protocols on Programmable Hardware. In *ACM SIGCOMM*, New Delhi, India, September 2010.
- A.0.51 Outsourcing Home Network Security. In *ACM SIGCOMM Workshop on Home Networking (HomeNets)*, New Delhi, India, September 2010.
- A.0.52 Challenges and Opportunities in Home Network Measurement. In *ACM SIGCOMM Workshop on Home Networking (HomeNets)*, New Delhi, India, September 2010. Panel Discussion.
- A.0.53 Wide-Area Routing for Distributed Services. In *GENI Experimenters Workshop*, Princeton, NJ, June 2010.
- A.0.54 Wide-Area Routing for Distributed Services: Tutorial. In *GENI Engineering Conference 8*, San Diego, CA, July 2010.
- A.0.55 Network-Level Spam and Scam Defenses. In *African Network Operators Group*, Kigali, Rwanda, June 2010.
- A.0.56 SwitchBlade: A Platform for Rapid Deployment of Network Protocols on Programmable Hardware. In *National Institute of Information and Communications Technology*, Tokyo, Japan, June 2010.
- A.0.57 Network-Level Spam and Scam Defenses. In *National Institute of Information and Communications Technology*, Tokyo, Japan, June 2010.
- A.0.58 Wide-Area Routing for Distributed Services. In *University of Tokyo*, Tokyo, Japan, June 2010.
- A.0.59 SwitchBlade: A Platform for Rapid Deployment of Network Protocols on Programmable Hardware. In *Stanford Networking Seminar*, Stanford, CA, June 2010.
- A.0.60 Network-Level Spam and Scam Defenses. In *MIT Computer Science Department Colloquium*, Cambridge, MA, May 2010.
- A.0.61 Network-Level Spam and Scam Defenses. In *Harvard University Computer Science Department Colloquium*, Cambridge, MA, April 2010.
- A.0.62 Network-Layer Support for Secure Routing and Access Control. In *DIMACS Workshop on Secure Routing*, New Brunswick, NJ, March 2010.

- A.0.63 Detecting General Network Neutrality Violations with Causal Inference. In *ACM SIGCOMM CoNext*, Rome, Italy, December 2009.
- A.0.64 Dynamic Access Control with Resonance. In *DIMACS Workshop on Network Management*, New Brunswick, NJ, November 2009.
- A.0.65 Network-Level Spam and Scam Defenses. In *Princeton University Computer Science Department Colloquium*, Princeton, NJ, October 2009.
- A.0.66 SNARE: Spatio-Temporal Network-Level Automated Reputation Engine. In *Message Anti-Abuse Working Group (MAAWG) Plenary Session*, Philadelphia, PA, October 2009.
- A.0.67 A Platform for Building Flexible, Fast Virtual Networks on Commodity Hardware. In *Cisco Routing Architecture Workshop*, San Jose, CA, October 2009.
- A.0.68 Network-Level Spam and Scam Defenses. In *EPFL Summer Research Institute*, Lausanne, Switzerland, June 2009.
- A.0.69 Bringing Experimenters and External Connectivity to GENI. In *GENI Measurement Workshop*, Madison, WI, June 2009.
- A.0.70 Network-Level Spam Defenses. In *University of Wisconsin Computer Science Department Colloquium*, Madison, WI, April 2009.
- A.0.71 Trellis: A Platform for Building Flexible, Fast Virtual Networks on Commodity Hardware. In *NSF NeTS FIND PI Meeting*, Arlington, VA, April 2009.
- A.0.72 Dynamics of Online Scam Hosting Infrastructure. In *Passive and Active Measurement Conference*, Seoul, Korea, April 2009.
- A.0.73 Demonstration of Topology Creation Service and BGP Session Multiplexer. In *4th GENI Engineering Conference*, Miami, Florida, April 2009.
- A.0.74 Network Security Research. In *Georgia Tech College of Computing Wine & Cheese Talk*, Atlanta, GA, April 2009.
- A.0.75 Network-Level Spam Defenses. In *Cisco Systems Security Seminar*, San Jose, CA, March 2009.
- A.0.76 Network-Level Spam Defenses. In *Stanford University Networking Seminar*, Stanford, CA, March 2009.
- A.0.77 Network-Level Spam Defenses. In *University of North Carolina Computer Science Department Colloquium*, Chapel Hill, NC, March 2009.
- A.0.78 Dynamics of Online Scam Hosting Infrastructure. In *CAIDA Active Internet Measurement Systems (AIMS) Workshop*, San Diego, CA, February 2009.
- A.0.79 Outsourcing Network Security with Programmable Hardware. In *GENI Security Workshop*, Davis, CA, April 2009.
- A.0.80 Spam, Phishing, and Online Scams:
A View from the Network-Level. In *University of Toronto Computer Science Department Colloquium*, Toronto, Ontario, Canada, December 2008.
- A.0.81 Detecting and Diagnosing Network Performance Degradations with Statistical Methods. In *IPAM Workshop on New Mathematical Frontiers in Network Multi-Resolution Analysis*, Los Angeles, CA, October 2008.

- A.0.82 Fighting Spam, Phishing, and Online Scams at the Network Level. In *Asian Internet Engineering Conference*, Bangkok, Thailand, November 2008.
- A.0.83 Multiplexing BGP Sessions with a BGP Session Multiplexer. In *3rd GENI Engineering Conference*, Palo Alto, CA, October 2008.
- A.0.84 Towards an Accountable Internet Architecture. In *The IEEE 22nd Annual Computer Communications Workshop*, Steamboat Springs, Colorado, October 2008.
- A.0.85 Network-Level Spam Filtering. In *IPAM Workshop on Applications of Internet MRA to Cyber-Security*, Los Angeles, CA, October 2008.
- A.0.86 Spam, Phishing, and Online Scams:
A View from the Network-Level. In *Yahoo Tech Talk*, Sunnyvale, CA, August 2008.
- A.0.87 Path Splicing. In *EPFL Summer Research Institute*, Lausanne, Switzerland, July 2008.
- A.0.88 Spam, Phishing, and Online Scams:
A View from the Network-Level. In *Google Tech Talk*, Mountain View, CA, June 2008.
<http://www.youtube.com/watch?v=IBPg9Lyta3A>.
- A.0.89 Making Tomography Practical: Scalable Network Monitoring for Fault Diagnosis. In *DIMACS Workshop on Network Tomography*, New Brunswick, NJ, May 2008.
- A.0.90 Network-Based Spam Filtering. In *Internet2 Members Meeting*, Arlington, VA, April 2008.
- A.0.91 Path Splicing. In *Carnegie Mellon University Computer Science Seminar*, Pittsburgh, PA, April 2008.
- A.0.92 BGP, Bogons, and Spam. In *DIMACS Workshop on Secure Internet Routing*, New Brunswick, NJ, March 2008.
- A.0.93 Can Great Research Be Taught? Independent Research with Cross-Disciplinary Thinking and Broader Impact. In *ACM SIGCSE Technical Symposium on Computer Science Education (SIGCSE)*, Portland, OR, March 2008.
- A.0.94 Path Splicing. In *Colgate University Computer Science Seminar*, Hamilton, NY, November 2007.
- A.0.95 Path Splicing. In *Cornell University Computer Science Symposium*, Ithaca, NY, November 2007.
- A.0.96 Path Splicing. In *Bell Labs Networking Seminar*, Murray Hill, NJ, November 2007.
- A.0.97 Usage-Based DHCP Lease-Time Optimization. In *ACM/USENIX Internet Measurement Conference*, San Diego, CA, October 2007.
- A.0.98 Network-Based Spam Filtering. In *University of Southern California Computer Science Symposium*, Los Angeles, CA, October 2007.
- A.0.99 Path Splicing with Network Slicing. In *Georgia Tech Algorithms and Randomness Center (ARC) Symposium*, Atlanta, GA, October 2007.
- A.0.100 Internet Availability. In *DIMACS Tutorial on Algorithms for Next-Generation Networks*, New Brunswick, NJ, August 2007.
- A.0.101 Towards an Accountable Internet Architecture. In *INTIMATE Workshop on Methods and Tools for Network Analysis*, Paris, France, July 2007.

- A.0.102 Path Splicing with Network Slicing. In *UCL Networking Seminar*, Louvain La Neuve, Belgium, July 2007.
- A.0.103 Composing Virtual Networks. In *Third NSF-NeTS FIND PI Meeting*, Arlington, VA, June 2007.
- A.0.104 Path Splicing with Network Slicing. In *UCSD Networking and Systems Seminar*, San Diego, CA, June 2007.
- A.0.105 Path Splicing with Network Slicing. In *NANOG 40*, Bellevue, WA, June 2007.
- A.0.106 AGORA: A Market for Internet Connectivity. In *Workshop on Programmable Routers for Extensible Services of Tomorrow*, Princeton, NJ, May 2007.
- A.0.107 Path Splicing with Network Slicing. In *NeXtworking 2007, the Second COST-NSF Workshop on Future Internet*, Berlin, Germany, April 2007.
- A.0.108 Towards an Accountable Internet Architecture. In *DARPA GIG Routing and Addressing Workshop*, Arlington, VA, February 2007.
- A.0.109 Towards an Accountable Internet Architecture. In *DARPA STO Assurable Global Networking Workshop*, Arlington, VA, February 2007.
- A.0.110 Improving Network Operations with a View from the Edge. In *National Science Foundation CyberTrust PI Meeting*, Atlanta, GA, January 2007.
- A.0.111 Network Virtualization for Experimentation and Profit. In *University of Michigan Networking Seminar*, Ann Arbor, MI, December 2006.
- A.0.112 Network Virtualization for Experimentation and Profit. In *Stanford Networking Seminar*, Stanford, CA, November 2006.
- A.0.113 Network Architecture Research. In *National Science Foundation NeTS-FIND Informational Meeting*, Reston, VA, November 2006.
- A.0.114 Network Virtualization. In *National Science Foundation NeTS-FIND PI Meeting*, Reston, VA, November 2006.
- A.0.115 Understanding the Network-Level Behavior of Spammers. In *Johns Hopkins Security and Applied Research Lab Seminar*, Baltimore, MD, October 2006.
- A.0.116 Revealing Botnet Membership with DNSBL Counter-Intelligence. In *NANOG 38*, St. Louis, MO, October 2006.
- A.0.117 VINI: A Virtual Network Infrastructure. In *Centre national de la recherche scientifique (CNRS)*, Paris, France, September 2006.
- A.0.118 Botnets and Spam. In *Seminar: Laboratoire d'informatique de Paris 6*, Paris, France, September 2006.
- A.0.119 Network Virtualization and Graph Embedding. In *Georgia Tech Algorithms and Randomness Center Seminar*, Atlanta, GA, September 2006.
- A.0.120 Cabo: Concurrent Architectures are Better than One. In *Cisco Internet Routing Research Symposium*, San Jose, CA, August 2006.
- A.0.121 Botnets and Spam. In *ARO-DARPA-DHS Special Workshop on Botnets*, Arlington, VA, June 2006.

- A.0.122 Understanding the Network-Level Behavior of Spammers. In *CS 548: Internet and Distributed Systems Seminar*, Stanford, CA, June 2006.
- A.0.123 Understanding the Network-Level Behavior of Spammers. In *NANOG 37*, San Jose, CA, June 2006.
- A.0.124 Campus and Personal Network Troubleshooting. In *Microsoft Research EdgeNet 2006*, Snoqualmie, WA, June 2006.
- A.0.125 Infranet: Circumventing Web censorship and surveillance. In *Georgia Tech NTG Seminar*, Atlanta, GA, April 2006.
- A.0.126 Filtering: Sharpening Two Sides of a Double-Edged Sword. In *Interzone 5*, Tucker, GA, March 2006.
- A.0.127 Theory of Measurement and Monitoring. In *Workshop on the Theory of Networked Computation*, Princeton, NJ, February 2006.
- A.0.128 Challenges and Opportunities in Internet Data Mining. In *Cisco Network Management Summit*, San Jose, CA, February 2006.
- A.0.129 BGP Spamming Agility. In *NANOG 36*, Dallas, TX, February 2006.
- A.0.130 Spam Forensics. In *IEEE Security and Privacy Crystal Ball Workshop*, Berkeley, CA, February 2006.
- A.0.131 Network Security. In *Georgia Tech Information Security Center Lunch*, Atlanta, GA, January 2006.
- A.0.132 Geographic Locality of IP Prefixes. In *NANOG 35*, Los Angeles, CA, October 2005.
- A.0.133 rcc demonstration. In *NANOG 35*, Los Angeles, CA, October 2005.
- A.0.134 Detecting BGP Configuration Faults with Static Analysis. In *Princeton University Systems Reading Group*, Princeton, NJ, October 2005.
- A.0.135 Proactive Techniques for Correct and Predictable Internet Routing. In *University of Cambridge Symposium*, England, United Kingdom, June 2005.
- A.0.136 Proactive Techniques for Correct and Predictable Internet Routing. In *Hewlett-Packard Laboratories*, Palo Alto, CA, October 2005.
- A.0.137 Open problems in BGP anomaly detection. In *CAIDA Workshop on Internet Signal Processing*, San Diego, CA, November 2004.
- A.0.138 On end-to-end path failures and routing instability. In *CAIDA Workshop on Internet Signal Processing*, San Diego, CA, November 2004.
- A.0.139 Wide-area network data and analysis at MIT. In *CAIDA Internet Measurement Data Catalog Workshop*, San Diego, CA, June 2004.
- A.0.140 Verifying wide-area routing configuration. In *NANOG 31*, San Francisco, CA, May 2004.
- A.0.141 Verifying wide-area routing configuration with rcc. AT&T Labs; Florham Park, NJ, February 2004.
- A.0.142 Verifying wide-area routing configuration with rcc. In *NYU Systems Reading Group*, New York, NY, February 2004.

- A.0.143 A systematic approach to BGP configuration checking. In *NANOG 29*, Chicago, IL, October 2003.
- A.0.144 Characterizing path failures: Location, characterization, correlation. In *CAIDA Internet Statistics, Metrics, and Analysis Workshop*, Leiden, The Netherlands, October 2002.
- A.0.145 Infranet: Circumventing Web censorship and surveillance. In *Harvard Kennedy School of Government Seminar*, Cambridge, MA, November 2002.
- A.0.146 Infranet: Circumventing Web censorship and surveillance. Hewlett-Packard Laboratories; Palo Alto, CA, August 2002.
- A.0.147 Infranet: Circumventing Web censorship and surveillance. In *Carnegie Mellon University SDI Seminar*, Pittsburgh, PA, April 2002.
- A.0.148 Controlling the impact of BGP policy changes on IP traffic. In *NANOG 25*, Toronto, Ontario, Canada, June 2002.

VI. PERSONAL DATA

Born: Stanford, CA
Home Address: Atlanta, GA 30308-1490
Citizenship: USA
